Argentina Jails 5 Junta Officers; Galtieri Is Freed

BUENOS AIRES - Jorge Videla and Admiral Emilio Massera, former members of Argentine military juntas, were sentenced to life in prison Monday by a civilian court on charges of human rights violations during the 1970s.

Three others among the nine members of the three successive military juntas that ruled Argentina after a March 1976 coup toppled President Isabel Perón were sentenced to prison terms by a sixjudge federal appeals panel.

But the last Argentinian military president, General Leopoldo Gal-tieri, was acquitted, as were the two other members of his junta, Admiral Jorge Anaya and Brigadier General Basilio Lami Dozo.

Brigadier General Omar Graffigna, air force commander from 1979 to 1981 in the second junta and the only one of the nine defen-dants at liberty during the trial, also was cleared of all charges.

General Roberto Viola, who led the second junta, was sentenced to 17 years in prison. Admiral Armando Lambruschini, navy commander in the second junta, was sentenced to eight years and Gen-eral Orlando Agosti, air force com-mander in the first junta, was sentenced to four years and six months

Under the three juntas, the armed forces led a campaign to wipe out leftist terrorism and subversion. According to official fig-ures, 9,000 people disappeared for political reasons in Argentina from 1976 to 1982. Human rights organizations put the figure at closer to

President Raúl Alfonsin ordered the nine former leaders to be put on trial in a decree issued three days after his Dec. 10, 1983, inauguration. The verdicts come on the eve of the second anniversary of Argentina's return to elected civilian rule after nearly eight years of military dictatorship

The task of trying the nine was first turned over to a military court, but the Federal Appeals Court took over the trial in September 1984 after military judges said they could not reach verdicts in the time A public trial that lasted

The new president begins his GUATEMALA CITY — Mario five-year term on Jan. 14. He will succeed General Oscar Humberto crat, has won a landslide victory in Mejia Victores, the last of five

> The country has been ruled by military or military-dominated governments since a 1954 coup backed by the U.S. Central Intelli-gence Agency toppled the left-lean-ing administration of Jacobo Arbenz. Guatemala's last civilian president was Julio César Méndez Montenegro, who held office from 1966 to 1970.

Diplomats and other observers ezo, a lawyer, with 1,133,517 votes, or 68.3 percent. His sole opponent, malan military will fully hand over the powers of government to the new civilian president.

General Mejía Victores reiterattional Center, won 524,306 votes, ed Friday that the military had no intention of continuing to exercise political influence. "Armies are not designed to govern," he said at a ceremony honoring the Guatemalan Air Force.

But Mr. Cerezo has admitted that the armed forces will continue to wield considerable authority in the country and that the new president will rule only with the military's approval.

"Nobody hands over total power from one day to the next," Mr.

Mr. Cerezo's main political sup-port comes from the Indians who form more than 60 percent of the population. He was the only candidate to have acknowledged publicly that the Indians have borne the brunt of the political violence.

Human rights activists estimate that in the past 20 years the army and rightist death squads have killed or kidnapped 38,000 people, mostly Mayan Indians who live in Guatemala's central and northern highlands, where a leftist insurgency remains active.

Despite the attention paid abroad to the role of the military here, the new president's major test may be to revive the economy. Mr. Cerezo has promised an "emergency economic program," aimed first at stabilizing the currency. But the business sector is likely to resist tax increases considered necessary to reduce the government's budget (AP, WP, Reuters) articles.

This photograph showing Andrei D. Sakharov and his wife, Yelena G. Bonner, was part of a videotape given to representatives of a West German newspaper in Moscow. The film, believed taken with a hidden camera, purportedly shows the Sakharovs in good health, shopping at a food market in Gorki and discussing the recent summit meeting in Geneva.

5 Countries End Lawsuit On Rights In Turkey

STRASBOURG, France - Five West European countries that brought Turkey before the European Court of Human Rights have agreed to drop the case following Ankara's promise to speed up its return to democracy, the European Commission for Human Rights announced Monday. The settlement ends more than

three years of litigation on charges of torture of political prisoners and other violations of the European Convention of Human Rights.

Observers here said it appeared to mark a substantial victory for the government of Prime Minister

Turgut Ozal.
The five plaintiffs are France,
Denmark, the Netherlands, Norway and Sweden. They agreed to the settlement when they were as-sured that the Turkish authorities would redouble their efforts to stop the torture and would lift martial law. Mr. Ozal said in April that martial law would be lifted throughout the country "within 18

The Turkish government agreed that the State Supervisory Council, a body set up to investigate the allegations of torture, "will be in-structed to have special regard to the strict observance by all public authorities," including the military, of the convention's provision pro-hibiting the mistreatment of prisoners, it said.

Turkey agreed to submit progress reports every three months and to allow members of the European human rights body to conduct

on-scene investigations. The litigation, which was initiated in July 1982, was a stigma pre-venting Turkey's full admission into the fold of European democra-cies even after its November 1983 parliamentary elections, which ended three years of military rule.

The 21-nation Council of Europe, although admitting Turkey's parliamentarians into its assembly, has been highly critical of human

UN Unanimously Censures Terrorism

UNITED NATIONS (AP) — The United Nations closed ranks Monday on one of the most divisive issues facing it and unanimously adopted a resolution condemning all acts of terrorism as criminal.

The U.S. representative, Vernon A. Walters, hailed the action, taken without a formal vote by the 159 members of the General Assembly, as "a symbol of new times." The text denounced "acts of international terrorism in all its forms which endanger or take innocent lives, jeopardize fundamental freedoms and seriously impair the dignity of human be-

ings."

Cuba, the sole dissenter when the General Assembly's legal committee adopted the resolution Friday by a 118-1 vote, shifted its position and joined the consensus at Monday's plenary meeting. Israel, which had abstained in committee along with Burkina Faso, also supported it.

U.S. Holds 3 Ghanaians in Arms Case

NEWARK, New Jersey (AP) - U.S. customs agents have arrested three Ghanaian citizens on charges they conspired to buy missiles, antiaircraft guns and other weapons to arm a 100-member group in the West African country.

The three men, arrested after a four-month investigation, were identified as Joseph Henry Mensah, 67; John Andrews Boateng, 44; and Kwasi John Baidoo, 40.

Mr. Mensah, an economic consultant, carried a document identifying him as a member of the Ghana Democratic Movement, and investigators said the weapons apparently were earmarked for that group.

Maria Rosa Echeverri after her rescue in Armero.

Woman, 75, Rescued in Colombia

BOGOTA (Reuters) - A woman of 75 has been rescued from the devastated Colombian town of Armero more than three weeks after the Nov. 13 volcanic eruption that killed about 23,000 people, the city's

appointed mayor said Monday.

Major Rafael Ruiz Navarro of the Colombian Army said that Maria Rosa Echeverri was found last weekend in her shack of corrugated metal. She survived on provisions acquired just before the eruption. When Red Cross workers found her, she was cooking her last portion of rice, with

Major Ruiz Navarro said that Mrs. Echiverri's poor eyesight was probably the reason she never found a passage across the sea of mud that buried Armero.

Guyana Holds Parliamentary Vote

GEORGETOWN, Guyana (AP) — Residents of Guyana voted Monday in what President Desmond Hoyte promised would be "free and fair" elections, but opposition candidates accused the government of planning

elections, but opposition candidates accused the government of planning massive ballot rigging.

Voters were electing 53 members to the National Assembly, a unicameral parliament. Mr. Hoyte's socialist People's National Congress party held 41 seats in the outgoing assembly, compared to 10 for the People's Progressive Party and two for the conservative United Force.

Cheddi Jagan, 67, who heads the pro-Moscow Progressive Party, accused the government of manipulating the list of 372,708 eligible voters. He demanded that ballot boxes be opened and counted at the polling stations instead of being moved to 10 regional counting stations established by the Election Commission, on which all three parties are represented.

Doctors Protest Abductions in Beirut

BEIRUT (AP) — The police searched Monday for two prominent Christians, one a physician at the American University Hospital, who were abducted in Moslem West Beirut, as doctors demonstrated to protest the seizures.

It was the first protest march by physicians in the Lebanese capital after months of sectarian abductions, bank holdups and car bombings. About 150 doctors walked from the hospital compound to Prime Minister Rashid Karami's office.

Three representatives met with Mr. Karami and demanded govern-ment action to secure the safe release of Dr. Munir Shammaa, the head of the hospital's abdominal department, and Joseph Salamek, a prominent

8 Israelis Killed in Fire at Army Base

JERUSALEM (WP) - Eight Israeli soldiers were killed and seven others injured when a bunkhouse in an army base in the occupied West Bank crupted in Itames early Monday, the army command said.

A Syrian-based Palestinian guerrilla group, the Democratic Front for the Liberation of Palestinia, claimed responsibility for the fire, saying its amen inflitrated the base and planted incendiary charges. However, the Israeli Army command said Monday that while it is not ruling out the possibility of sabotage are initial inventional and the possibility of sabotage are in the possibility of sabotage are in the possibility of sabotage are initial inventional and the possibility of sabotage are initial and the possibility of sabotage and planted in the possibility of sabotage are initial and the

possibility of sabotage, an initial investigation showed that the fire appeared to have started accidentally.

The fire occurred at a small base adjacent to a Jewish settlement at Shiloh, midway between Jerusalem and Nablus. An army spokesman said that no explosion was heard before the fire was discovered in the wood and aluminum portable structure. He said the victims were all in sleeping bags, and could have suffocated quickly before help arrived.

Chinese Students Call Off Protests

BEJJING (Renters) - Chinese students backed down from staging demonstrations Monday after weeks of official pressure, as authorities admitted that economic reforms had caused alarming price rises and

Pate,

Student sources said they had called off rallies planned for Beijing and the central city of Xian that were intended to mark the 50th anniversary of protests against invading Japanese forces. Chinese students have held at least three unsanctioned demonstrations since September, mixing antiapanese slogans with criticism of rising prices and other problems arising from economic reforms. The Beijing Review said Monday that the economic reforms had sent

food prices up, sometimes to alarming degrees.

For the Record

Pakistani troops put down a revolt by Pasistan tribesanes in the Khyber-Pass last week, President Mohammed Zia ul-Haq said Monday. He said the Afghan-backed tribesmen, accused of arms and drug trading, had China, which established diplomatic relations with Nicaragua on Saturday, announced Monday that it will provide that nation with interest-free

loans to be used for "projects, equipment and materials" agreed upon by both governments. Brussels police evacuated about 3,000 people Monday from a majorit shopping center, after they received three telephone calls warning of an imminent bomb explosion. No bomb was found.

By Philip Taubman

New York Times Service MOSCOW - While world attention has been concentrated on how Mikhail S. Gorbachev has tackled relations with the United States, the new Soviet leader has been quietly injecting new vigor into Moscow's contacts with developing countries since he assumed power in March.

"Gorbachev has given a new burst of life, if not creativity, to Soviet foreign policy in the Third World," a Western diplomat said after the visit here last week of Zimbabwe's prime minister, Robert Mugabe. It was Mr. Mugabe's first official visit to Moscow after years of cool relations with the Kremlin.

Mr. Mugabe, who is scheduled to become the leader of the Non-aligned Movement next year, was the latest in a growing list of Third World leaders to meet with Mr.

Potentially, the most important development in Soviet ties with developing nations may be a gradual improvement in relations with China. But Soviet officials and Western diplomats say this process will take many years and is likely to be slowed by Soviet doubts about Beijing's adoption of Western-style

economic practices.

In the meantime, Mr. Gorbachev has welcomed Rajiv Gandhi of In-dia, who came here twice, Colonel Moamer Qadhafi of Libya, Mengistu Haile Mariam of Ethiopia. Arabia, which has no formal rela-

Ratsiraka of Madagascar, Le Duan of Vietnam, Kaysone Phomvihane of Laos and Daniel Ortega Saave-

dra of Nicaragua. Some are longtime Soviet allies.

preparing the way for long-range efforts to expand Soviet influence

sia has rejected a \$180-million loan to build three hospitals. Liberia ex-The changes in Mr. Gorbachev's approach pelled all Soviet diplomats last

toward the Third World, like those in other policy areas, have been mainly a matter of style and intensity, Western diplomats say.

With them, Moscow has been ar-ranging new arms sales and shoring lieve. They said that as long as up relations, which were somewhat Soviet troops remained in Afghanineglected during the years when the Kremlin leadership changed from Leonid L Brezhnev to Yuri V. Andropov to Konstantin U. Cher-

nenko to Mr. Gorbachev. Syria and Ethiopia, for example, are important allies in the Middle East and Africa, Laos and Vietnam are considered members of the So-

But Mr. Gorbachev also has been forging new relationships. In the Gulf, Moscow established diplomatic relations in October with Oman, a country that Washington has courted intensively because of its strategic location beside the Strait of Hormuz.

Diplomatic relations also were opened last month with the United Arab Emirates. Trade with Saudi stan, an intensely Islamic country, Moslem leaders were likely to be hostile toward the Soviet Union.

Mr. Gorbachev also must walk a careful line in the Iran-Iraq war. Soviet aid to Iraq has been increas-ing, but Moscow has tried to stay on good terms with Iran.
The Soviet presence in Afghani-

stan also affects relations with India. Prime Minister Gandhi has avoided criticizing the Soviet military involvement there but has called for returning Afghanistan to nonaligned status.

The Indian leader received trade

and investment credits totaling \$1.5 billion when he visited Moscow in May. But he also has improved his relations with Washington. Mr. Gorbachev has agreed to visit India, probably next year.

vote at the expense of the Commu-nists in Cyprus's parliamentary elections, but his rightist oppo-The changes in Mr. Gorbachev's approach toward the Third World, like those in other policy areas, have been mainly a matter of style and intensity. Western diplomats "The basic goal still remains the building of ties and influence in the ic Party 27.3 percent, the Communists 27.1 percent and the Socialists

hope that eventually some of these countries will transfer from a nonaligned or pro-Western status to a more pro-Soviet position," a diplomat said.

In regions of high risk, the diplo-mats added, Mr. Gorbachev has acted cautiously. They cited Nica-ragua, where he has comented ties to the Sandinists by providing des-perately needed oil and increasing the flow of Soviet arms, but has refrained from actions that could provoke a U.S. military response gainst Nicaragua.

"As we look at the overall picture in the Third World," an American diplomat said after Mr. Mugabe's visit last week, "we see a more as-sertive and confident Soviet policy, but so far we don't see anything unusually alarming."

WASHINGTON — The U.S. government, after months of surprising unanimity in pressuring President Ferdinand E. Marcos to reform, finds itself increasingly divided over what actions - including proposed cuts in military aid to the Philippines — are needed to give bite to the U.S. bark.

The policy dilemma came to a head last week with the reinstatement Dec. 2 of General Fabian C. Ver as chief of the Philippine armed forces and a subsequent move by the U.S. House of Representatives to cut military aid to Manila from the \$100 million requested by the Reagan administration to \$25 million.

General Ver and 24 other military men, along with one civilian, were acquitted of involvement in the 1983 murder of Benigno S. Aquino Jr., the opposition leader. their complicity.

Laurel Files in Manila. Says Marcos Can Be Beat

By William Branigin Washington Post Service

MANILA - The opposition leader, Salvador H. Laurel, filed a formal certificate of candidacy Monday to run for president and said there would be "no more backing out" in favor of a rival challenger, Corazon C. Aquino.

The development occurred as President Ferdinand E. Marcos pondered a list of seven potential running mates for his own re-elec-tion bid in February. According to presidential palace sources, Mr. Marcos's wife, Imelda, has been promoting her own candidacy behind the scenes despite denials that she seeks the vice presidency.

However, the sources said, she is not among those being considered by Mr. Marcos as his ruling New Society Movement party prepares to hold a convention Wednesday to proclaim his formal candidacy for re-election to a fourth term.

Mr. Laurel became the first major opposition figure officially to enter the presidential race when he went Monday to the Commission on Elections to file his candidacy.

"It's now final," he said as he completed the formalities. "There is no more backing out. From now on it's all systems go for Unido."

He referred to his political party, the United Nationalist Democratic Organization.

Mr. Laurel's move increased the prospect that the fractious opposition would field two candidates against Mr. Marcos. But Mr. Laurel predicted he could still win. though he conceded that "it would be much harder" than if the opposition fielded a single ticket.

"I am not fazed by the fact there may be two opposition candi-dates," he said. He predicted that Mr. Marcos would get only 20 percent of the vote, leaving 80 percent for the opposition.

Mr. Lauret said he thought Mr.

Marcos would let the election "go through if he believes he can cheat to win. If not, he may find a way to cancel the election." The vote is set for Feb. 7, more than a year before

Mr. Marcos's term expires,
Some opposition figures believe
that Mr. Laurel may be playing
into Mr. Marcos's hands with his apparent determination to fulfill a long-held ambition and run for president.

"He just committed political suicide." said an opposition legislator, Homobono Adaza.

"I don't think he has any chance. He's just deluding himself."

Mubarak Asserts PLO Must Have Peace Process Role

By Michael Getler and Christopher Dickey

Washington Post Service CAIRO - President Hosni Mubarak has strongly endorsed the need for a major role by the Palestine Liberation Organization in the Middle East peace process and crit-icized the United States for at-

tempting to weaken it.
"The PLO is the sole representative of the Palestinians, whether we like it or not," the Egyptian leader

"You in America can't understand, really, what we mean," he said of his motives for backing the PLO chairman, Yasser Arafat. "Trying to solve the problem and

at the same time trying to ignore the PLO - this will never lead to a comprehensive peace," he added. said that U.S. attempts to water really. The only thing is Taba." down Palestinian representation on a joint Jordanian-Palestinian nego-

thing in the very near future so as to range of issues related to that disas-negotiations to end the hijacking of Israel's pre-1967 borders.

lose everything."

He praised what he called the "flexibility" of Prime Minister Shimon Peres of Israel and suggested that all that now blocked a possible meeting between the two countries was a border dispute over a small piece of land at Taba on the Gulf of

Other issues that have contributed to the "cold peace" between the two countries now are largely re-solved, Mr. Mubarak said.

The withdrawal of Israeli troops from Lebanon "is nearly finished," Mr. Mubarak said, adding that Peres has shown very good flexibility in attempting to improve the quality of life in the occupied in an interview, Mr. Muharak territories. "He is doing his best,

In his first interview with a U.S. a joint Jordanian-Palestinian nego-tiating team had gone too far and image of an EgyptAir jetliner to Malta wasted more than six months in a last month, and the assault by crucial period when "time is slipmately cost the lives of 58 persons, "That's why we should do some- Mr. Mubarak touched on a wide

picions" that the Libyan leader,

Colonel Moamer Qadhafi, was behind the hijacking, and confirmed that there had been a state of alert. and a reinforcement of air bases near the Libyan border. But he ruled out any main-force attack on Libya.
"I'm not going to punish the Lib-yan people because of such an inci-

dent done by a single man, Qadha-fi," Mr. Mubarak said. "Th never do it. I'm a man of peace. I have nothing against the Libyan peo-

He defended his decision to storm the EgyptAir jet in Malta, saying, "We used force when we found no way out."

"I thought initially that there would be a dislogue" with the hijackers, Mr. Mubarak said. He denied reports that the explo-sive charges used by the comman-

dos to enter the plane were responsible for the fire and smoke that killed most of its occupants.

Mr. Mubarak said that U.S. in-

keep the momentum of the peace ter, and to his complex but close the Achille Lauro cruise ship in October played no part in his decision to attack the plane in Malta. He had incurred American wrath

> soft on terrorism when he attempted to hand the hijackers over to the PLO for trial. At one point he said of the hi-

in the first case for allegedly being

force, still you are accusing Egypt. It's all very strange, really. Mr. Mubarak also denied that a oint appearance with Mr. Arafat

last month to issue a "Cairo Declaration" was an attempt by him to embrace the PLO leader in the hope of recapturing wider standing for Egypt within the Arab world. "That's an unfair comment," he

In the declaration, Mr. Arafat renounced terrorism and pledged not to carry out attacks outside what he loosely defined as "the occupied territories." Subsequent PLO statements have indicated dignation at the way he handled the that this still allows attacks inside

Mr. Mubarak said he also discussed with Mr. Arafat acceptance of the two United Nations Security Council resolutions, 242 and 338 that effectively recognize Israel's right to exist.

"But we didn't put any pressure on him to agree on it here," he said, Mr. Mubarak said his relations jacking of the EgyptAir plane: "If with the Reagan administration Egypt didn't use force, and the hijackers were killing the people, you would like the United States to make much more of an effort."

"The United States is a main participant," he said. "They could play a pivotal role" in persuading all sides, including Israel, "just to

Mr. Mubarak said that other sensitive points in ties with Washington, including the seizure by U.S. Navy jets of an Egyptian place carrying the Achille Lauro hijackers, have been largely put be-

He said the two countries had "good cooperation" in dealing with terrorism. Mr. Mubarak said members of the U.S. Delta Force commando team "were ready to help, of course," but the Egyptians did not ask for such assistance.

Israel Frees 2 Jews in Shrine Plot

By Thomas L. Friedman

New York Times Service JERUSALEM - President Chaim Herzog of Israel has commuted the prison sentences of two members of the Jewish terrorist underground who had been convicted of plotting to blow up one of Is-lam's holiest shrines, his office said.

The commutations were annotinced Sunday as the Knesset prepared to debate a proposal by a group of religious parties to pardon the 17 Jewish extremists still serving prison terms for crimes ranging from murdering Arab schoolboys to illegally transporting weapons.

The hill was scheduled to receive a first hearing on Monday, and Prime Minister Shimon Peres was expected to come under heavy pressure from the religious parties

— whose backing is critical for his political future — to support it strengthen his hand for rejecting The prisoners freed by Mr. Her-

zog are Dan Beeri, 41, and Yosef to blow up the Dome of the Rock.
The building is situated on the
Temple Mount in the Old City of
Maier. Jerusalem. It was built around an . outcropping of bedrock from which Moslems believe that the prophet Mohammed ascended into

According to the court, the extremists' plan was to blow up the Islamic holy place to provoke the Moslem world into a cataclysmic holy war with Israel that would

force the Messiah to intervene. The two would have been eligible for release in April, after two-thirds of their three-year sentences. Israeli prisoners normally are given a one-years to only a few months for third reduction in sentencing for lesser crimes. Proponents of am-

good behavior.

In September the sentence of Uri Maier, who had been convicted of maimed two West Bank Arab mayors in 1980, was commuted six months before the end of a 30month term. Ill health was believed

Three of those still in prison are

more insignificant members of the of Jews by Arabs.

their own.

No Victors or Vanquished: Synod Unites All Factions

ntinued from Page 1) er there is or can be any real leader- al structure, devoid of its mystery.

Since those who are called libera The Vatican takes an entirely in some ways agree with the conserdifferent view. If the synod came out better than liberals feared it these passages might not seem too might, that is only because their fears were groundless, Vatican officials with the series of the passages might not seem too high a price to pay for a firm endorsement of Vatican II.

Moreover, if the synod was a agreed to publish the summary re-demonstration of diversity, its port was a victory for those who members seemed to be trying hard want to see the bishops play a to move toward some consensus, to stronger role and have a voice of

avoid debilitating divisions.

That consensus is contained in a final report that at times seems to pointed out, it was not difficult for shift within two sentences from one tendency in the debate to the other.

For example, it praises plural-ism, but warns against forms of pluralism that move "to dissolution and destruction" and can lead "to a pope said he was seeking a celebraloss of identity." It praises the good work of theologians, but warns that some theological discussions "have brought about confusion among the Christian faithful."

On the thorny questions raised by the theology of liberation, it leclares that "the church most in a rophetic way denounce all forms of poverty and oppression." But it notes that the church cannot separate its concern about injustices in this world from its overriding spiritual goals that relate to the next

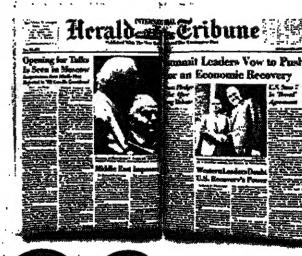

The document clearly criticizes 'a partial and selective reading" of Vatican II and a "superficial interpretation of its doctrine." And it includes a passage that

the pope himself has been seeking, and left him without a major bloc of challengers. Above all, and in contrast with many of the partisans, John Paul tends to take a mystical view of Vatican II and of the church. This often leads him in directions that seem to be - and often are conservative.

But his papacy is, more than anything, an attempt to assert the primacy of the spiritual over the material in an increasingly secular Co

goes to the heart of conservative.

If there is any theme that permeaguments about the church, critiates the synod's statement, it is this cizing those who would see Roman one.

Why the sudden rush?

From now until December 31, it's going to be very easy to find an IBM Authorised Dealer. Just follow the queue.

The first of the f

Role

Marie e No les reg les area no le tra Why this sudden flurry of buying activity? Well, for one thing, smart business owners know that the IBM Personal Computer can be a tax-deductible business expense.

Why not check with your tax consultant right now?

'Tis the season to do inventory – never a jolly chore.

But buying a PC now can put your stock situation in order, making it a lot faster and easier in the next year.

Some of the people rushing to buy PCs may simply be starting their New Year's Resolutions a bit early.

There's nothing quite like an IBM Personal Computer to really get organised.

Since there is an entire family of IBM Personal Computer products, now businesses of all sizes are joining the rush.

Whether you're looking for an economical printer (check out the low-cost, high-function Proprinter), a powerful personal computer (the PC AT is one of the fastest) or anything in between, there's a PC product just right for you.

The IBM Personal Computer.
The original PC is perfect for
businesses that need computing power
but don't need a big price tag.

And starting the year off with an IBM PC handling word processing, financial forecasting and analysis can help make the bottom line look a lot more attractive 12 months down the road.

The IBM Personal Computer XT.
The PC for companies that are
planning to expand in 1986.

Businesses are buying both models of the Personal Computer XT: one comes with two diskette drives and the other has one diskette drive and a 10-megabyte hard file.

They both come with eight expansion slots, so you can easily add more memory and storage as your business grows.

And right now both models are available at reduced prices.

The IBM Personal Computer AT.

For some companies, an ordinary personal computer just isn't enough.

So IBM offers the Super PC. With three times the speed of a regular PC and up to 20,000 pages of storage, the Super PC is the most powerful IBM Personal Computer.

If one of your plans for the new year is to clean up your filing system, the Super PC can give you a very good start.

The IBM Proprinter.

IBM's dot-matrix printstation is the low-cost answer for companies that want a full-function printer that fits their last quarter budget.

The Proprinter lets you use both sheet and fanfold paper without changing trays.

The IBM Wheelprinter.

If you want your business to make a better impression next year, then get the Wheelprinter this year.

It gives you high-quality characters and lets you switch printing styles in seconds.

The IBM Quietwriter.

1986 could be a very quiet year around the office.

The Quietwriter gives you letterquality printing, but its advanced technology makes it almost silent.

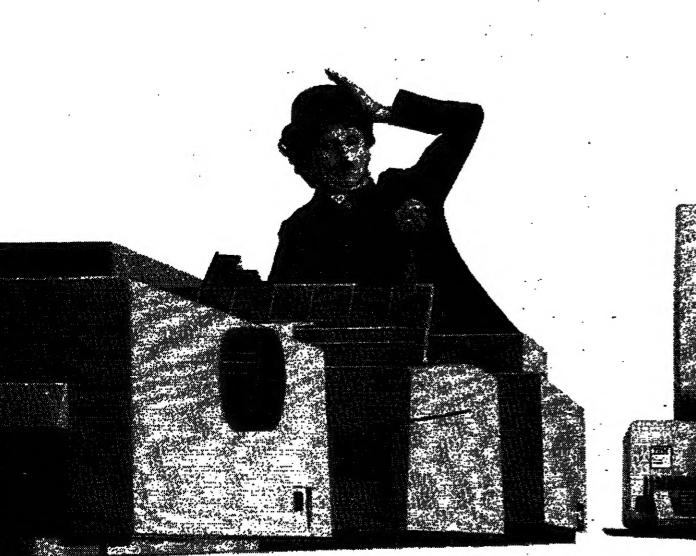

Even when it's printing at 500 words per minute.

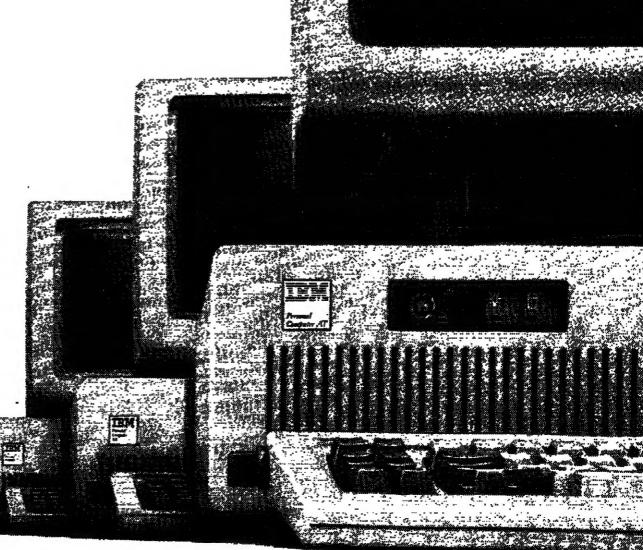

A visit to an IBM Authorised Dealer or Retail Centre will tell you more about IBM Personal Computer products.

Stop by today.

Because if you can't beat the rush, you might as well join it.

For further information write to IBM United Kingdom International Products Limited, West Cross House, 2 West Cross Way, Brentford, Middlesex TW8 9DY, England (Telex 27748).

The Business of Norms

In 1952 the American Psychiatric Associato accommodate these designations and to tion first published a manual classifying and tolerate behavior once thought unacceptable. describing mental disorders. It has since been revised and updated a number of times, and a new edition is now being prepared. In the case of most medical problems, scientists can readily agree on the nature of the symptoms and the effect the disorder is producing. But psychiatrists have a more difficult time accumulating data that are specific, and they regularly disagree over whether a given set of symptoms is even a mental illness. Homosexuality, for example, has at various times been classified as a disorder and as normal behavior. Alcoholism has been viewed as a physical illness and a treated as mental rather than physical dis-behaviorial disorder. Clearly something quite orders. Revisions are still under way. different from scientific analysis has gone into

the making of these various judgments.

The APA manual is published for use by medical professionals, but the classifications have come to have important social implications. Once a set of symptoms is recognized by the profession as a mental illness, persons exhibiting the symptoms can often claim in-surance benefits, invoke civil rights protec-tions and even offer the illness as a defense in criminal cases. Public opinion shifts gradually

In the course of the current revision of the manual, three new designations have become particularly controversial. In an early draft, the manual included mental disorders for rapist behavior, self-defeating personality and a form of premenstrual syndrome. Many psychiatrists objected to these new designations. Accused rapists, they warned, would claim exculpatory illness; abused wives who are victims of crime would be treated as if their own disorders had provoked abuse; women would

Psychiatrists play a critical role in our complex society not only because they treat the ill but because, in many cases, they define the norms. It is important that in their concern for the sick they be mindful of society's need to reinforce moral codes, to hold people responsible - in most cases - for their behavior and to provide protection against those who hurt others, acknowledge no rights but their own and destroy the peace of the community.

be stigmatized if premenstrual symptoms were

- THE WASHINGTON POST.

Enough Sugar Madness

Quotas that limit sugar imports have had the effect of tripling the price of sugar for American consumers. This protectionism is cent floor to ensure that the domestic crop is shipped to private refiners rather than dumped on Uncle Sam. The unintended side effect has backfiring on U.S. growers because the main consumers, commercial buyers, are switching to cheaper corn sweeteners. So the sugar lobby has pressed Congress for even tighter quotas that would further raise supermarket bills and impoverish efficient sugar exporters in Latin America. Only a House-Senate conference

committee can stop this madness. U.S. production is concentrated in a few states where it is a dominant economic interest. Their congressmen know it and the growers in Hawaii, Louisiana and Florida usually get what they want despite the opposition of consumers, refiners and the State Department.

Under the current four-year-old program, the government must maintain the domestic price at 18 cents a pound. Since that is far above the world price of 6 cents, country-bycountry quotas must be used to prevent a flood of imports that would force Washington to buy up the domestic surplus. Quotas are adjusted periodically to keep the domestic price at about 21 cents - just enough above the 18been to create a boom market for cheaper com sweeteners. And as corn displaces sugar in processed foods, the Agriculture Department has been forced to reduce imports further from

2.9 to about 2 million tons a year. Were there not some concern for friendly. sugar-producing nations abroad, the quota ight have soon been cut to below one million tons. But in September President Reagan held the line for foreign countries, including Brazil, El Salvador and the Dominican Republic, and

the sugar price slipped to 19 cents. Now the growers have struck back. They bartered their support for the Senate Republicans' farm bill for a provision that prohibits the U.S. government from buying surplus sugar. If that provision stands, the administration would be forced to slash the import quotas to drive the price back up to at least 21 cents. That would rock Latin American economies and add \$600 million to food prices at home. It is a costly treat Congress should not swallow.

Other Opinion

Bossy Work on the Borders

On a visit to France I observed that there were no customs or immigration formalities at all at Calais. As we drove off the ferry without showing our passports, we might have been smuggling a trunkload of illegal immigrants or a hundredweight of cocaine. The same was not true on our return to Dover.

Britain opposes plans for the phasing out of passport checks between Common Market ies on the grounds that this could make it easier for terrorists and other criminals to cross borders. At the same time, immigration officers promise a summer of maximum disruption unless more people are employed to help them in their useful work.

I suppose a case could be argued against pedestrian road crossings on the grounds that they might help a terrorist to cross the road. But that does not seem a good enough reason for preventing anyone else from doing so until he has proved he is not a criminal.

Peggy Fenner, a junior agriculture minister, warned travellers from France not to bring more than the permitted 1 kilogram of meat or powdered milk, on the grounds that to do so might spread unspeakable foreign diseases. But if French meat is liable to be poisonous or infected, then so is the permitted kilogram. There is no possible explanation for the attitude of successive British governments except. a passionate desire to boss us around.

Auberon Waugh writing in The Sunday Telegraph (London).

Expensive Performers in Space

People in outer space are mainly useful for dealing with problems that would not exist if they were not there in the first place, getting in the way of undramatic instruments that can easily reap the benefits of space.

But technological sense and dramatic appeal reflect different values. And that is why NASA, hoping to get \$8 billion for a needless cabin in the sky, had its astronauts tinkering in orbit recently with aluminum construction beams. It is also talking up a similarly super-

fluous venture, a manned trip to Mars that will take so long that planners say it is possible that cancer, heart attacks and other diseases of

- THE NEW YORK TIMES.

aging might develop along the way.

The wretched little secret of space politics is that humans are technologically a dispensable nuisance up there, inferior to and far costlier than sophisticated instruments. But without humans, space would be like a circus without high-wire acts - bad for the box office.

NASA goes into panegyrics over astronauts mentioned is that the cost of outfitting the Space Shuttle for human crews far exceeds the value of the saved satellites.

A manned Mars mission would be the pre-

mier example of prodigious waste on useless cargo. Relatively inexpensive unmanned satel-lites have already transmitted back volumes of precious scientific data. The medical probems, though difficult, are manageable. There would be no medical problems if useless hu-man cargo were left behind, but that would reflect a great mistake in space politics — the triumph of engineering over theater.

- Syndicated science commentator Daniel S. Greenberg (Washington).

Chosen for Temporary Duty

All one has to do to be assured a retirement income of \$86,000 a year is become president of the United States. The money assures that [former presidents] need not exploit the high office they have held and can carry out the responsibilities it places upon them for the rest of their lives. What is thoroughly unacceptable, though, are the escalating costs of main-taining Taj Mahal libraries, providing an im-perial office and staff and deploying a palace guard for lifetime protection. This is the year Congress finally should clamp controls on the fringe benefits that recent ex-presidents have learned to like too well. The Oval Office may produce king-size egos, but it is occupied only by citizens chosen by fellow citizens for tem-porary duty. It should not lead in retirement to a form of American royalty.

- The Oregonian (Portland).

FROM OUR DEC. 10 PAGES, 75 AND 50 YEARS AGO

1910: Greeks Victimized in Rhodes RHODES — Indignation prevails here regarding the administration of justice. When the Ottoman constitution was proclaimed, there were hopes that public services would be reformed, and notably the law courts, but the administration of the law is now in a more corrupt state than during the absolutist régime of Sultan Abdul Hamid. Greek residents are the victims of continual persecution and get no redress. The Greeks are in reality without a Consul, because M. Suidas, who was appointed to the post, is not recognized by the Turkish Government on account of his political antecedents in Macedonia. Gangs of Mussulman maranders parade the city, terrorizing the Greeks and obliging them to close their shops. The police look on but do not intervene.

1935: Roosevelt Defends Farm Policy CHICAGO - Defending the Administration's farm policy as designed to end conditions which "turned the farmers virtually into serfs," and denouncing its critics as "political profiteers," President Franklin D. Roosevelt told the American Farm Bureau convention [on Dec. 9] that the agricultural problem is a national matter and must be subject to the jurisdiction of the Federal government rather than of the forty-eight states. The President claimed the Administration's program had in-creased farm incomes by \$3 billion in the past two and a half years. He admitted that some retail prices were too high, but said: "Lifting the prices of farm products to a level where the farmer can live is opposed chiefly by the few who profited heavily by the depression."

A Chinese Lesson: Interest Can Overcome Ideology

By Warren Christopher

The writer was U.S. deputy secretary of state from 1977 to 1981. This is the second of two articles.

LOS ANGELES — A refusal to be diverted from internal reform seems to be the operating principle of China's foreign policy in the 1980s, Its reaction to Victnamese strikes this year in Cambodia has been muted. especially in contrast to the "teach them a lesson" approach of the late 1970s. Relations with South Korea are edging toward normalcy.

For good measure, China has trimmed its military budget and it plans to reduce the size of the People's Army by one million men. As a nuclear power China has shown no interest m an arms race with anyone
— maintaining less than 250 nuclearcapable missiles and bombers, compared to thousands for the Soviet Union and the United States. Meanwhile, the country's domestic

trends have been riveting.

China has not become a liberal, democratic society. Political and personal freedoms are still sharply confined. But there have been drastic and accelerating departures from the Marxist economic model.

They began with reform in agricul-ture. In 1978 the Chinese started shifting from farming communes to a system of contracts with family farmers. They adopted regulation by mar-ket forces, profit incentives and ex-periments in enterprise economy. The agricultural reform was called a

"self-responsibility system." (Not a bad way to define U.S. aims.) It has been stunningly successful bumper harvests for four years running, doubled production of food grains permitting sharp cutbacks on purchases abroad. The shift has produced great wealth in the countryside and a sense of excitement, perhaps even of mission, among rural Chinese. And rural reform has helped China resist the surge of migration to the large cities that has plagued so

many developing countries.

Last year the Chinese moved their c revolution to urban areas. Reforms include far-reaching steps out of character with a Marxist sys-

tem. The goal of the 400,000 stateowned enterprises in China is no longer aiming to fill bureaucratic orders but a return of reasonable profits. Managers now make their own plans in such areas as wages, suppliers, investment and production. American-style training has been adopted in management, marketing and accounting, using instructors from American universities.

There is official acceptance, even approval, of the accumulation of alth. Private ownership is permitted for shops, restaurants and medium-size businesses. Perhaps most striking of all, China is granting permission for private companies to sell shares of stock to the public.

Chinese leaders are not timid about describing what they are doing. The party leader himself, Hu Yao-

welcome so long as it catches mice.

As Prime Minister Zhao Ziyang says, "We learned our lessons the hard way ... Now we know what works best for China."

ical leftist nonsense" associated with Mao. As an example of "nonsense" he recited Mao's phrase, "Better to have socialist weeds than capitalist seedlings." Now the favored maxim is the reverse, summed up in the aphorism from China's top leader, Deng Xiaoping, that a cat of any color is

Quotations from Marx. Lenin and Mao are still invoked to rationalize the new policies, but a Chinese official told me recently that the reforms would create "200 million rich Chinese." These changes are historic. No major Communist country has

bang, has said that China "wasted 20 tried to move so far toward a market years" after 1949 because of the "radeconomy. There is evidence that the rapid pace of decentralization may have outrun the competence of local managers. A mere promise of change in the pervasive system of price controls caused a ripple of panic buying: when actual price increases come, discontent is bound to follow. Opposition is surfacing among bureaucrats who are losing power and who call the reforms "spiritual pollution." This is plainly a time of testing.

What will happen when Deng Xiaoping now 81, leaves office? He gives every indication of being con-cerned with posterity as well as power. He has designated his successors - Hu Yaobang the party leader, Zhao Ziyang the premier. A cadre of younger people has replaced a generation of aging leaders, in the largest

power shift since 1949. The strategy. is to assure that today's directions Tit.

will survive their chief author. The reforms are manifestly popular - and, on the whole, working China has grown at sustained rates? comparable to Japan in the 1960s and South Korea, Taiwan and Hong Kong in the 70s. As businessmen dealing with China can attest, the country hungers for advanced technology, and incorporates it readily ---

in effect, skipping whole generations in building an industrial base. China is a forceful answer to the suggestion that every Marxist society is irretrievably hostile to Western in-terests. Nations and peoples can be subjugated by stronger outside powers, and we know this is a Soviet ambition. But China shows that nations, when able, are more likely to follow their own interest than someone else's script. It just might be true that time is on freedom's side.

Los Angeles Times.

But Why All This Official Trust in Chinese Nuclear Restraint?

WASHINGTON — As U.S. intelligence agencies struggle with the implications of Larry Wu-Tai Chin's 20 years of top-level spy-ing for China, across town at the State Department they are readying a celebration: The long-sought United States-China nuclear trade pact, under which China will get technology and materials for miclear power, is the nuclear deal was being negotiated —unqualified reliance on such assurabout to become a reality.

In its current form, as the Reagan administration has acknowledged, the accord is unverifiable. China has refused to permit the International Atomic Energy Agency to keep track of U.S. nuclear exports or to allow comprehensive U.S. inspections. The agreement gives Washington a vague right to "visits" and "exchanges of information" — but not the program of systematic accounting required in all other agreements with nations

that import U.S. nuclear materials, including Britain and France.
In essence, that means trusting China's word that it will not misuse visible nuclear issue. nuclear transfers. With the U.S. government accusing China of 20 years of deceit — which continued even as

ances hardly seems warranted. More than potential Chinese nuclear chicanery is at stake. The sensitive nuclear pact has been treated by both sides as a key barometer of U.S. Chinese relations. In the immediate aftermath of the spy scandal, Washington's stand on the accord may be the single most important indicator of how scriously it views China's spy-ing exploits. President Reagan's fist-shaking at all the spies in our midst

By Leonard S. Spector seems like so much bluster now that he has decided to continue business as usual with China on the highly

> There is also the question of candor. Only days before China's spying activities were revealed in the press —at a time when they were certainly known to senior CIA and Justice Department officials - key members of the Senate Foreign Relations Com-mittee were briefed by the CIA. On the basis of that briefing, the committee expressed its support for the nuclear agreement. Did the committee learn of China's spying activities at the briefing and decide to endorse the

agreement anyway? Or was this in-formation withheld because it would upset the nuclear deal?

strengthen ties with a potential anti-Soviet ally — despite the damage to other U.S. interests.

The delivery of nuclear materials is still months away, and in the interim there will be further talks on what the "visits" and "exchanges of information" specified in the pact really mean. These talks could lead to truly effective safeguards. But there is little reason to believe that U.S. negotiators will be instructed to insist on such safeguards — or that China, having observed Washington's solicitude in the wake of the Chin affair. will be prepared to grant them.

The writer is senior associate at the Carnegie Endowment for International Peace and author of "The New Nuclear Nations," an annual report on the spread

When Japan Marched to War, a Dissenter Was a Non-Citizen

N EW YORK —At school on the morning of Dec. 8, 1941, the battle station bell of the flagship Mikasa pealed out, as it did every morning, for roll call. The Mikasa had led the Japanese victory over the Russian Baltic fleet; the bell was yet one more daily reminder of the Japanese military traditions that my schoolmates and I lived to uphold. But that morning the bell had another resonance: At breakfast, my mother and brother and I had

heard the news of our attack on Pearl Harbor. As junior high school students, we had learned that our virtual annexation of Manchuria was our protection against the advance of Communism after a power vacuum was created by the collapse of the Chin dynasty. It was also true, however, that the Depression had resulted in the collapse of Japan's West-ern markets, and the population had doubled in 50 years. Expansion through military conquest seemed to be a solution to many of Japan's economic problems.

"samural" spirit strengthened the cause of those who urged military spending and strength. Our traditions, after all, taught us churia in 1933 came the establishment of a strength.

By Kensuke Fukae

not to question leadership and authority. Anyone who questioned the military budget was considered "hikoku-min" — a "non-citiwas considered mixous min — a non-du-zen" — and as such was thought to be endan-gering our sacred national security. The more aggressive the military became, the more it was able to win concessions from the moderate elements in the government who feared

the United States reacted to the occupa-tion of points in Indochina by declaring a virtual trade embargo that included oil. On Dec. 8, we were told that our strike was against a hostile nation that was usurping Japanese property, choking off oil and demanding our withdrawal from China. In the schoolyard, talk was excited and patriotic. We were 16; in a short time more than a third of us would take our places in the army and naval academies. Soon school was, practically

"thought police." The military establishment now controlled not only the administration but also the media. Censorship of news was sanctioned for "national security reasons." Anyone — editor, professor, politiciam — expressing a dissenting opinion could be arrested as a Communist sympathizer or similar undesirable. Patriotism ran high in our isolat-

ed land, and the administration defined all of its actions in terms of national security.

Within a few years the media were being used to exhort the people to fight to the glorious end. The kamikaze mentality flourished as citizens of all ages sharpened bamboo spears to ward off invaders. Firebombs rained destruction on every major city exceptible old certifal. Knote On March 10, 1945. the old capital, Kyoto. On March 10, 1945, 200 B-29 bombers incinerated more than 50 percent of metropolitan Tokyo and 80,000 residents, On Aug. 6 and 9, America dropped atomic bombs on Himshima and Nasseari

the radio for the first time. For over 2000 years the emperor had been regarded as the sacred descendant of Shinto God. None of us had ever heard his voice. We accepted that the war was over, although we were still ready to die for our country. It was a moment of relief and disappointment; almost everybody cried.
In the next several days many officers committed hara-kiri, in keeping with the samurai code. Some young men organized partisan groups to fight to the death rather than be

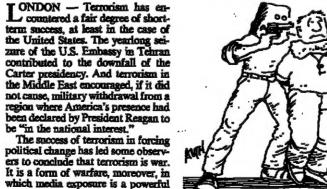

captive. But for most of us the emperor's order to surrender was absolute. We were and are a deeply patriotic nation. America, unlike Japan, has a strong tradition of dissent. America was built on the right to challenge authority. Such a tradition was -tragically absent-in my homeland as I grew up. Americans should cherish it, for it is such rights that most merit their patriotic devotion. Our loyalty was to our leaders. America's must be to the Constitution.

The Media and Terrorism: Coverage **Should Be Complete and Reasonable**

By Katharine Graham

Mrs. Graham is chairman of the board of The Washington Post Company. The following, the first of two parts, has been adapted from the 1985 Churchill Lecture, which she delivered at Guildhall in London on Dec. 6.

weapon. As a result, we are being encouraged to restrict our coverage of terrorist actions. Prime Minister 41 Tr. 46 Paylant where Margaret Thatcher has proclaimed: "We must try to find ways to starve the terrorist and the hijacker of the oxygen of publicity on which they depend." Many people, including some reporters in the United States, share her view. Most of these observers call for voluntary restraint by the media in covering terrorist actions. Some go so far as to sanction government control — censorship, in fact should the media fail to respond.

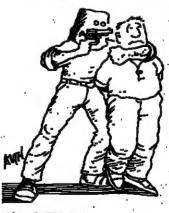

However, I am against any government-imposed restrictions on the free

flow of information about terrorist acts. Even media-sponsored guidelines would be too broad to be useful or would be forgotten in the heat of a crisis. Instead, I favor as complete coverage of terrorism by the media as possible. Here are my reasons:

• Terrorist acts are impossible to ignore; they are simply too big a story to pass unobserved. If the media did not report them, rumor would abound, and rumor can do much to inflame and worsen a crisis.

 Specialists find no compelling evidence that terrorist attacks would cease if the media stopped covering them. On the contrary, they believe that terrorists would increase the number, scope and intensity of their attacks. If we ignore them, terrorists would turn up the volume until the world could not avoid hearing. Citizens have a right to know what the government is doing to curb terrorist attacks. Some of the solu-

tions raise disturbing questions. At the same time, I believe that the media can help the government re-solve terrorist crises and save lives, even though it is not our role to do so. Coverage can be an insurance policy for hostages. As soon as hostages appear on television, they may be

somewhat safer. By giving the terror-ists an identity we make them assume more responsibility for their captives. In addition, the government relies to some extent on the news media for information about a crisis that can be used to resolve it. One government official ackreviriged to me that American news organizations have more resources to devote to these crises — in money, people and tech-nology — than does the State Department. We also sometimes have greater access to the perpetrators. In the Middle East, government officials are often sealed in their bunkers. Frequently, terrorists refuse to speak to them but want to talk to reporters. These factors are important. They

have contributed to the resolution of terrorist crises and helped save lives, But I would quickly add that covering terrorist acts and urban violence presents very real and exceedingly complex challenges. There are should do. Three critical issues, in particular, must be addressed. All touch the central question of how the press can minimize its role as a participant in the crisis and maximize its role as a provider of information.

The first issue involves knowing how to gather and reveal information without making things worse, without endangering the lives of hostages or jeopardizing national security. In the early days of covering urban violence and terrorist attacks, the me-dia would descend on the scene. lights ablaze and cameras rolling in bot pursuit of the news. Sometimes we did not know what could put lives at risk, and we were often less than

tages in Washington in March 1977, There were live television reports that the police were storming a building when in fact they were merely bring-ing in food. Some reporters tele-phoned the terrorists inside the build-ing, and one interview rekindled the rage of a terrorist leader who had been on the point of surrendering. Such potential disasters have led to discussion between the police and the media on how each could work better with the other. A more professional approach on both sides has resulted.

At the beginning of a crisis, most authorities now know that it is best to establish a central point where reliable information can be disseminated as quickly and efficiently as possible. The media, knowing that the authori-ties intend to help them obtain the information they need, are much

more willing to cooperate.

In particular, the media are willing to—and do—withhold information. that is likely to endanger human life or jeopardize national security.

During the U.S. Embassy crisis in Iran, one of our Newsweek reporters became aware than six Americans known to have been in the embassy were not being held; he correctly con-cluded that they must have escaped to the Swedish or Canadian embassies. But we and some others who knew this did not report it because we knew it would put lives in jeopardy.

When Lebanese Shiftes hijacked a TWA flight and took 153 hostages.

the media learned — but did not report — that one hostage belonged to the U.S. National Security Agency. Tragically, however, we in the me-dia have made mistakes. In April 1983 some 60 people were killed in a

bomb attack on the U.S. Embassy in Beirut. At the time there was coded radio traffic between Syria, where the operation was being run, and Iran, which was supporting it. Alas, a tele-vision network and a newspaper col-umnist reported that the U.S. govern-ment had intercepted the traffic, and soon the traffic ceased. This undermined efforts to capture the terrorist leaders and eliminated a source of information about future attacks Five months later, apparently the same group struck again, at the U.S. Marine barracks in Beirut; 241 servicemen were killed. No one is absohitchy sure the news reports caused the traffic blackout. Some suspect that they did. Whatever the answer.

those detailed reports did not help.

This kind of result, albeit unintended, points up the necessity for full cooperation wherever possible. between the media and the anthori-ties. When the media obtain specially sensitive information, we are willing to tell the authorities what we have learned and what we plan to report. While reserving the right to make the final decision ourselves, we are anxious to listen to arguments about why. information should not be aired.

A second challenging issue that the media have to address is how to prevent terrorists from using the media as a platform for their views. International Herald Tribune.

LETTERS TO THE EDITOR

Intellectual Terrorism

Miles Copeland's gist is commendable. ("No. Criticism of Israel Is Not Anti-Semitism." Dec. 1.) To brand someone as an anti-Semite because he or she disagrees with Israel's policies is intellectual terrorism. Just as the existence of Israel should not be negotiable, neither is the free expres-

sion of opinion and loyalty. MICHAEL M. FRENKIEL

Housy-Verviers, Belgium. Mr. Copeland's assertion that most influential foreign policy positions in the U.S. government "are filled by Jews" is ludicrous. Just as unfounded cooperative with police.

fore the birth of Christ.

By George Gudauskas

PARIS - A rare stone lacking luster in the rough, the diamond is the most paradoxical of gems, bearing great same and seductive pow-

Through the centuries, April's birthstone has emerged as a symbol for light, life, the sun, durability, incorruptibility, invincible constancy, sincerity and innocence.

Today, diamonds are widely known as symbols of love and trust. Diamonds have always been the choice of the rich, the royal, the famous, gaining high reputation because they are the most expen-sive, the hardest, the most brilliant and the rarest of gems.

Pliny the Elder, the Roman naturalist, encyclopedist and writer, said, "Diamonds represent the eatest value not only of the gens but of the good things on Earth."

And T. Nichols wrote in 1652 in "The History of Pretions Stones" that "the pure diamond is a hard, diaphanous perfectly transparent stone, which doth sparkle forth its glorie much like the twinckling of a glorious starre."

The unsurpassed beauty of a pol-ished diamond is determined by how it reflects light. Its facets are painstakingly placed so that it admits and returns the maximum. The diamond then literally sparkles and glitters like a star.

In unpolished form, however, the diamond is a vague crystal stone, lacking luster. It is downright dull and needs skilled cutters and polishers to bring out its beauty.

The "four Cs" — carat, color, clarity and cut — determine the amounts to about 47 million carats, or nine tons, with Africa by far the polished diamond's real value. largest producer. The Soviet Union and Australia have also become im-Despite its value, the diamond's portant participants in the world

Gentlemen today are shier, indulging only in the odd timepiece or culf link. But the purveyors of diamonds have been conspiring with limited success, to expand this neglected segment of the market. Collections for men have been designed confronting diamonds with leather and steel, inlaying them on smooth wooden spatulas or letting them masquerade as the miniature ball at the end of a tiny gold polo mallet. There are taboos to be bro-

great names in jewelry have had to become inventive. As they had to adjust when the maharajahs and many of the crowned heads of Europe faded into history, they are having to adjust today as the oil money flows less freely. Some have made multimillion-dollar businesses by refocusing part of their activities on new customers in a different income bracket. There are still new "boutique" lines opening on the Place Vendôme, the mecca of the industry, where starting prices for a bauble with the odd diamond hover

Marketing has evolved. It is true that most women in the jewelry ads are there only to display their husbands' spending power, but De Beers has a new campaign insinuating that only the man whose wife (or life partner) has just presented him with a diamond can be a yuppie really worthy of the name. Many of the highly tailored individuals who ply their trade on the rue de la Paix are doubtful this tactic will really breed a generation of latter-day Sun Kings, but things

Take the engagement ring for example, whose function has become somewhat ambivalent, at least among the cohabiting middle classes. Nowadays, when the conple finally reaches the registry office, there may be only a single ring doing the job of two. (The problem is what to call it: De Beers' Centre du Diamant, not altogether successfully, tried "les nouveaux fiances," hoping to borrow from the sophistication of the New Roman-

ticism and nouvelle cuisine.) Then, there is the problem of partial to baubles, there has been a shrinking not only in the number of state occasions but in the surface of apparel available for adornment. weight of gold and platinum, there No hats, hence no hat pins; no is room for innovation.

For a Skilled Stone Cutter,

Life Is on the Solitary Side

cutting is a fascinating job, presenting new chal-lenges with each precious stone he fashions.

"I'm learning every day," he told a visitor to the

factory where he works, in a corner of a drab room whose only light comes from his workbeach and

its, one might think. But the princi- kets about which investors should pai attractions of diamonds — be aware. The first is for top-quali-specifically, color, cut, clarity and ty, investment-grade diamonds like prices in this category could fall even lower due to surplus supply and negligible inflation, against which diamonds are used as a

or jewelry-grade, goods, where prices have held steady and in some cases improved since 1980. Brokers say a recent jump in market activity during the past two months sug-gests increased demand for bigger, better quality stones, which could mean that the overall slide in prices

"I can't foresee much more on the downside," said Greg Herdemian, vice president and manager of Empire Diamond Corp., which he said is one of the largest buyers from the public in the world.

Brokers like Empire report demand exceeding supply in dia-monds, ranging from half a carat to more than 5 carats in fine color grades from D through I, and clar-ity grades between Flawless and VS2. Diamond color scales run alphabetically from D to M, while clarity is judged from IF (Flawless) and VVS1 (Very, Very Slight 1) to

"We're paying more than we have in the past for those grades," said Mr. Hardemian, who added that Empire was buying "aggres-

One reason for improved demand is that the jewelry market is booming. According to the Ameri-can Diamond Industry Associa-tion, demand for jewelry has increased steadily from 40 million pieces in 1980 to more than 45 million last year.

ty and more weight, especially in engagement rings, according to Lloyd Jaffe, chairman of the group. Mr. Jaffe said the average size of price the stone has jumped from about

one-quarter of a carat in 1980 to a source at Cartier in New York, who little more than a third of a carat asked not to be identified. When last year, while the price has gone you sell, you sell at a wholesale up from \$700, to \$827.

Another reason is that secondary supplies of better jewelry-grade diamonds are becoming scarce. And with more and more people buying diamonds for jewelry, certain grades are showing a greater ability to appreciate in the short-term.

Some of the best results can be found in better quality "eye clean" stones with colors between D and F, said Martin Armstrong, chairman of Princeton Economics, an international consulting firm that follows markets for investors. They'll appreciate 30 to 50 percent over short-term of a year and a half to two years and double on a prices three- to four-year basis," he add-

The average price for "eye clean" stones, according to William Nelkin, a jeweler in New York's dia-mond district, runs about \$3,000. Mr. Nelkin, who has spent 63 years in the business, agrees that these ly popular and could appreciate along with the jewelry market.

demand for jewelry-grade stones will result in a corresponding need for newly cut stones to replace the old, which could lead to higher

"What you have now are new goods, and new goods cost money."

That does not mean that brokers are recommending buying dia-New jewelry from retail stores, as opposed to jewelry-grade dia-monds, generally has a mark-up value of between 100 percent to 150 percent or more over the value of the stones used in a setting. When it comes to selling such a stone, the market does not reflect the original

Still, investment-grade dia-monds are hardly offering better returns for the short-term. A oneing price of between \$11,000 to \$12,000, while transactions are usubelow the \$65,000 such a diamond sold for in 1980 and is about back to its 1976-1977 price.

There's potential for improvetainty," said Martin Rapaport, author of a weekly New York newsletter called the Rapaport Diamond Report that lists diamond

At the French Table: History in Exhibit

By Ann Barry
New York Times Service

I themselves quite seriously in the gastronomic realm, and never more so than in "Les Français et la Table," a retrospective of eating hab-its and customs from the Celts to the present at the Musée National des Arts et Traditions Populaires in the Bois de Boulogne through April 21. Cutlery, ceramics, glassware, metal pieces, paintings, prints and furniture are arranged in showcases and in rooms to illustrate the evolution of dining à la française.

There are few ancient texts that describe a common meal and it is necessary to rely on archaeological findings. Indeed, what is particularly striking in the initial stages of the show is an almost desperate reliance on shards or fragments of objects — a worn-away knife, a

scantily patched bowl.

In the beginning, people gathered in a circle on the floor to sup. It was not until the 12th century that the table made sitters of squat-ters. Staples of the Celtic diet were were the basic appointments.

Drink was a status symbol — imported Italian wine for the better off, mead for the lower classes. Un-til the 19th century it was advisable to drink cider, beer or wine, not only for caloric fuel but as a substi-tute for rain and river water.

According to a study of Languedoc peasants of the 15th century, an agricultural worker consumed 4,163 calories a day, 84.6 percent of which was derived from bread. (The average daily intake of an adult man today is about 2,400 calories, about 15 percent derived from bread.) Meat was a rarity, constituting 4.6 percent of the diet. The fork, an instrument proper to a society of meat-eaters, did not be-come firmly established until the 17th century.

At first, people carried their own knives to table. These knives, since their ends were pointed, probably functioned as weapons also. Not until the 17th century, when the fork and plate came into common

Kaleidoscopes Turn From Toys to Objets d'Art

New York Times Service

N EW YORK — The kaleido-dren's toy, is now the stuff of museum shops and boutiques. In the hands of modern craftsmen it has been elevated to something of an

only the inner imagery of the kalei-doscope but the exterior housing demands its own aesthetic. Whether of sleek Plexiglas, carved wood or burnished brass and copper, today's kaleidoscopes bear the mark of an individual maker — indeed, some are made in signed limited editions. Sizes vary from a vestpocket cigar-size version to a 500-pound (225-kilogram) giant operated with gears and pulleys. The images can be just as individualistic, ranging from sound-activated "fireworks" to lyrical abstractions. In the United States, prices for modern scopes range from less than \$5 to more than \$5,000.

Eric Senizer, owner of the Light Opera Gallery in San Francisco, specialized in art glass and Russian acquer boxes. On a whim, he bought an ordinary commercial ka-leidoscope at a 1981 trade show. At a local craft fair shortly thereafter, he met Carolyn Bennett, who was making them in several styles, and bought a second. When another kaleidoscope artisan, Sheryl Koch, makers, has seen a marked resurvalked into his shop with her brass gence of interest, particularly in the design with two revolving leather—last two years. In his view, people of or 45 degrees — produces design with two revolving leather—last two years. In his view, people 90, 60 or 45 degrees — produces bound glass wheels, he thought he are attracted to "things from a siminages of four, six or eight symmetwould see if his customers might be pler age, when we weren't set on as captivated as he was. He bought destroying ourselves — the kaleitwo at what he considered a ludi-doscope represents a different time crows \$100 each. That was on a and period."

Jazz and Rock Albums of '85: A Shopper's Guide

A Christmas shopper's guide to some good jazz and rock records of 1985:

"Lost in the Stars, the Music of
Kurt Weiß" (A&M). After his eccentrically east Thelonious Monk
collection, "Thet's The Way I Feel
Now," the producer Hal Willner
has collected Sting ("Mack The
Knife"), Lou Reed ("September
Song"), Charlie Haden, Tom
Waits, Carla Bley, Phil Woods,
Mariamne Faithfull and others performing material from Kurt Weill's
Berlin and American periods.

"Live in Stockholm, 1960" (Dragon). Lip service has been paid to
jazz as "America's only native art
form" and "the classical music of
the 20th century." This previously
unreleased concert recording is a
concrete example — the 20th century on its best behavior. (Wynton
Kelly, piano, Paul Chambers, bass,
jimmy Cobb, drums.

Robert Wyatt, "Old Rottenhat"
(Rough Trade). The author of
"Rock Bottom" and "Ruth Is Berlin and American periods. Thoroughly researched, tastefully paced, the treatments remain faith-

ful to the original spirit without getting lost in the past. Bennie Wallace, "Twilight Time" (Blue Note). Robust, sensitive, funky, precise, accessible, intelligent, funny, diligent — all these conflicting adjectives apply to the latest album by a longtime "prom-ising young" saxophonist who has hereby matured and fulfilled his potential. Together with featured potential. Together with featured sidemen — the former Miles Davis guitarist John Scofield, Dr. John (The Night Tripper) on piano and Stevie Ray Vangim, the new blues guitar sensation from Texas — Wallace has put together a free-wheeling hard-driving mix from "Tennessee Waltz" to his own simulace act Colonnian lines lack Deous post-Coltranian lines. Jack De-Johnette's drumming deserves spe-

Sting, "The Dream of the Blue Turtles" (A&M). The fact that this fine album sold more than a miltion copies is an encouraging sign.
There are those who believe that
Sting did not lead his hot young
jazz band (including Branford
Marsalis on saxophones and Omar Hakim on drums) far enough into their potential and that it's all too conveniently commercial, but the songs are adult and beautifully sung, the musicianship is superb, the music swings. Like Bruce Springsteen's "Nebraska" and ca-

FUTURES AND OPTIONS

World Coffee Prices Soar On Brazil Drought Fears

ONDON — Fears that a long-running drought could perhaps halve Brazil's coffee crop next year have sent coffee bean prices soaring in London and New York in possible. Traders in Brazil, the world's biggest coffee producer, say that the country's 1986-87 coffee harvest could sink to as little as 13 million to 16 million 60-kilo (132-pound) bags, or around as 13 million to 16 million 60-kilo (132-pound) bags, or around bags.

as 13 million to 10 million ou-kilo (152-pound) bags, or around half of the figure produced this year, as a result of a spell of hot, dry weather that began in May.

The news has fueled already buoyant sentiment in the key London and New York markets. Figures compiled by the International Coffee Organization in London, the 75-nation carted that attempts to control world prices, show that the average world

price for coffee on the spot market is now around \$1.57 a pound, the highest level since mid-1980.

The drought has hit Brazil's prime On the London Commodity Exchange late Monday, the Robusta contract for Septem-ber delivery traded as high as producing areas, accounting for the £28 (about \$41) per metric ton above Friday's settlement bulk of its exports. price and £1 above its open-ing, to £2,170, before settling back amid later profit-taking.

On the New York Coffee, Sugar and Cocoa Exchange, where coffee prices rose their limit-up on Friday amid hectic trading, coffee for September delivery closed up .30 cent a pound from the previous close, to \$1.9220, after being up as much as 2.30 cents. "I think there is every possibility that prices could hold at this

"I think there is every possibility that prices could hold at this level and possibly even go a little further," said a dealer at a leading London trading firm.

The drought has hit Brazil's prime producing areas, responsible for most of the country's better quality Arabica mundo novo and Arabica tatuai coffees, which traditionally make up the bulk The of the country's exports.

Exporters in the Brazilian port of Santos said Brazil, which accounts for nearly a third of world exports, generally needs around 17.5 million bags of good quality coffee to meet domestic and foreign demand, far more than will be available next year.

RADERS ALSO are worried that Brazil's coffee trees could take years to recover from the damage inflicted by the drought, threatening harvests beyond next year.

Reflecting on the current supply shortage, analysts at the London trading firm of E.D. & F. Man said in a report Monday that the coffee market will be in deficit by July 1986, removing the need for controls administered by the International Coffee

The 75 member nations of the ICO agreed in October to limit the amount of coffee supplied to the world market in a bid to hold world prices within a \$1.20-to-\$1.40-a-pound price band. Under the pact, the amount of coffee made available by the ICO's exporting members is increased or cut in step with prearranged price triggers.

But because of shortages, the overall export quota was already been raised by 1 million bags last month, to 57 million bags, and traders expect a similar increase to be triggered by the ICO this

The E.D. & F. Man report argues that the current strength in prices means that the ICO's export quotas could be suspended altogether by the curl of February as a way of defusing the market and bringing coffee bean prices back within the ICO's target

The loss of a major portion of the coffee crop would be a blow to the efforts of the new government of President Jose Sarney to repay Brazil's foreign debt, estimated at about \$103 billion. Although coffee is not Brazil's major foreign-exchange earner,
the crop has an annual export value of some \$3.5 billion, or about 25 percent of this year's estimated trade surplus of \$14 billion.

EC Aides Back Job Strategy

Goal Is to Reduce Unemployment

Compiled by Our Staff From Dispatches BRUSSELS - Finance minis-BRUSSELS — Finance ministers of the European Community adopted Monday a strategy for economic growth that they believe should lead to a major cut in unemployment within four years.

The plan calls for deregulation, tax cuts and other boosts to private investments, but recommends wage moderation for workers.

moderation for workers.

The EC commission, which proposed the changes in its annual economic report, said the plan could enable the community to reach an annual growth rate of 3 percent to 3.5, percent next, year nstead of the expected 2.5 percent. The EC's memployment rate is now 11.2 nercent.

West Germany had initially ob-jected to the proposal, which gave it the leading role in reactivating the stagnating European economy, but changes were apparently made in the plan and it was finally ap-proved unanimously. Officials did not explain what made West Germany change its mind.

The finance ministers could not agree Monday on common interest rates for export credits.

Diplomats said the discussion focused on a new method to calcu-late commercial interest reference rates, minimal public export credit rates for low-interest currencies such as dollar, yen, British pound, Deutsche mark, Dutch guilder and the European currency unit.

The commission has proposed to link CIRR to five-year government bonds. To take account of loan costs, a premium of 0.3 percent to 1 percent would be added to the

Diplomats said that countries with low interest rates, West Ger-many, the Netherlands and Britain, ed that the premium exceed 1 percent to align export credit rates as much as possible on commercial

Vaduz castle, seat of Liechtenstein's ruling family, whose expanding financial empire is administered by Christian Norgren, a 44-year-old banker from Sweden.

Liechtenstein, the Financial Realm

By Frank J. Prial

New York Times Service

VADUZ, Liechtenstein — Edward Crankshaw, the historian, once said of the Hapsburgs that they differed from other monarchs because they literal-

by owned their empire.

That empire, the Austro-Hungarian, is gone, and so, for all practical purposes, are the Hapsburgs. Now some descendants from a distant branch of the family live on in Liechtenstein, a country of just 62 square miles (160 square kilometers) between Switzerland and Austria.

ters) between Switzerland and Austria.

And it might be said of them, as it was of the Hapsburgs, that they own it.

But they do not run it, at least not alone. Tending to Liechtenstein's fortunes is largely the responsibility of Christian Norgren, a Swedish banker who was brought in by the princely family

Under Mr. Norgren's leadership, Liechten-stein's financial empire, built largely on the success of its banking system, has been spreading its wings to the United States and other countries. And, all signs indicate that Liechtenstein's U.S. presence is

going to be even more noticeable in the coming months.

Mr. Norgren, who has degrees from a business school in Lausanne, Switzerland, and from Stan-ford University, is charman of Bank in Liechten-stein AG. He is also president and chief executive officer of the Prince of Liechtenstein Foundation, set up in 1970 at the behest of Serene Highness Prince Franz Josef II, Liechtenstein's ruling

Last year, the 89-year-old monarch gave all governmental responsibilities to his eldest son, Hans Adam, the bereditary prince, who, like Mr. Norgren, is 44 years old. A local businessman said, "The old prince is chairman of the foundation board, but Norgren runs everything, in consultation with the hereditary prince,"
The Prince of Liechtenstein Foundation owns

ractically all of the bank and invests the royal family's considerable wealth around the world.

Its holdings include forests in Austria, real estate in Vienna, a publishing house in Dresden, East Germany, and a stunning art collection that, since

MOSCOW - U.S. Commerce

Secretary Malcolm Baldrige said

Monday that the Geneva summit

meeting could spur U.S.-Soviet trade, but he also reaffirmed U.S. restrictions on trade with the Soviet

Union and said commerce could not grow without a political thaw.

Mr. Baldrige called on about 600
American and Soviet businessmen
attending the opening day of a
U.S.-U.S.S.R. Trade and Economic

Council meeting to "maintain a strong sense of realism" about

trade between the countries.

That's not quite accurate. The number that is causing all the excitement — \$11,792,232,783.83. lawyers said. Texaco argued that, even grant doesn't actually contain any zeroes. ing Pennzoil's version of the dis-But it is so large that there is a tendency to view it as an abstracpute, Pennzoil was entitled to no more than about \$500 million. The jury last mouth put the figure at \$7.35 billion, before adding \$3 biltionship to reality was a central issue in two days of heated hearings here this past week.

That colossal sum — damages

lion in punitive damages. Getty's oil and natural gas re-serves had become a target for outplus interest charges — is what Texaco Inc. was ordered to pay after a jury had found last month siders after a split in the family of the late J. Paul Getty, the founder of the Getty fortune, who died in J. Paul Getty's son, Gordon P.

that the third-largest U.S. oil com-pany had wrongfully intruded on Permzoil Co.'s attempt to acquire a stake in Getty Oil Co. two years Getty, administrator of a family trust that owned 412 percent, had become impatient with what he re-On Friday, Judge Solomon Cas-seb of the Texas District Court ad-journed post-trial hearings in the case, telling the lawyers to return Tuesday. Many expect him to rule garded as its disappointing performance and mediocre dividends. Gordon Getty began a series of moves two years ago to gain full control of Getty Oil. But when another of J. Paul's sons challenged then on the jury's verdict, Judge Casseb can accept it in full, reduce Gordon's control of the trust and

the amount of the judgment or overrule the jury and dismiss the The basis of the dispute about the size of the verdict is the nature of the stake in Getty Oil Co. that ing the first week of January 1984. Had Pennzoil merely agreed to

Sidney R. Peterson, the strupple for and of Getty's underground wealth was thrown open.

On Dec. 28, 1983, Pennzoil announced its intention to buy 20 percent of Getty's stock for \$100 a share, 25 percent above the market price at the time.

Gordon Getty, taking on Pennzoil as an ally, agreed that Pennzoil would buy three-sevenths of the was backed by Getty's chairman, company's shares. As trustee, Gor-

1984. Two days later, Getty Oil's board approved a modified version of the agreement for a cash merger with Pennzoil, giving Getty Oil's public shareholders the equivalent of \$112.50 a share for its threesevenths' stake. Pennzoil officials say that they counted on gaining control of three-sevenths of Getty's oil and

gas reserves, the equivalent of 1 billion barrels of oil, which was the prize in the agreement from Pennzoil's standpoint. What Pennzoil lost was I billion barrels of oil," said James Kronzer, one of its attorneys. That's what we had, and they took

it away. What happened in the next few days was a large part of testimony heard by the jury in Judge Casseb's courtroom this summer and fall. The Pennzoil-Getty agreement

became unglued almost immediately — whether Texaco lured Getty away or was invited to bid for Get-(Continued on Page 16, Col. 3)

NEW YORK - The New York Stock Exchange roared to a record close Monday amid expectations of lower oil prices, subdued infla-tion and further declines in interest rates. Trad-

90,543,720 37,874,840

ing was heavy.

Progress on legislation to balance the federal budget also encouraged buying, dealers said.

The Dow Jones industrial average climbed 19.84 points, to close at 1,497.02, surpassing its previous record limish of 1,484.40, set last Wednesday. Broader market indicators also adversed.

The NYSE Index climbed 0.63 to 117.62, The NYSE Index climbed 0.63 to 117.62, brushing up against but not exceeding its previous record of 117.70. Standard & Poor's 500-stock index rose 1.26 to 204.25, matching its high of 204.23 set Wednesday. The price of an average share jumped 19 cents.

Big Board volume expanded to 144.01 million shares from 125.54 million on Friday and advancing issues outpaced decliners 1,020-665 among the 2,068 issues traded.

Traders said the primary force behind the market's push yo was the likelihood that oil

market's push up was the likelihood that oil prices would fall.

The Organization of Petroleum Exporting Countries concluded its year-end strategy meeting by agreeing to abandon efforts to prop oil prices through production restraints. OPEC

ministers as well as some industry analysts said this could mean a global oil price war. Hildegard Zagorski, a Wall Street analyst, cited the OPEC announcement and progress ou legislation to balance the federal budget as two excellent" news items that helped both the

BUSINESS ROUNDUP

Energy Cooperative To Merge With Svenska

vernment-owned Svenska Petro-Tourn AB and Oljekonsumenternas Forbund, the consumer energy cooperative, will merge, the Swedish news agency TT reported Monday. Energy Minister Birgitta Dahl aid at a news conference that it was in the interests of both the government and consumers that there should be one large Swedish company in the oil market.

. Ulf Dahlsten, the government negotiator who brought the two companies together in talks over two years, said the new company, which will be called OK Petroleum AB, would have 21 percent of the domestic market for all oil products and 21 to 22 percent of the gasoline market. OK currently controls about 19 percent of the domestic gasoline market and Svenska 25 to 3 percent.

Both companies had been affected by the shrinking market for oil products and by price wars.

OK had losses of 410.5 million from (\$53.6 million) after finan-cial income and expenses in 1984. compared with 1983 losses of 151.6 million. Svenska Petroleum had losses of 6 million kronor in 1984, compared with losses of 30 million in 1983.

OK's chairman, Leif Lewin, said the cooperative would have losses of about 200 million kronor in 1985, while SP was expected to

show a 1985 profit. The new com-STOCKHOLM — Sweden's go-pany should have profits of at least re-riment-owned Svenska Petro-100 million kronor in 1986, he said.

Svenska Petroleum's managing director, Lars Hjorth, who will be managing director of the new company, said the new company would acquire all of Svenska's operations, including its gasoline stations and its 51-percent interest in SP Exploration AB.

It will also take over OK's import, refining and fuel-oil activities. but the 20 local associations that make up the cooperative will continue to run their own gasoline stations. The cooperative is expected to buy gasoline from the new com-pany, Mr. Hjorth said. OK Petroleum AB will have an

annual refining capacity of about 4 million metric tons (4.4 short tons) through its 35.5-percent interest in the Scannaff refinery at Lysekil on Sweden's west coast and its 22-percent stake in a British Petroleum refinery. OK said last month that it had signed a letter of intent to sell half of its 43-percent interest in Scanraff to Norsk Hydro A/S.

The new company will also have 50-percent interest in OK Kracker AB's cracking facility, with annual capacity of 1.2 million

Germans, Dutch **Back Production** Of a New Chip

Agence France-Presse
BONN — The West German and Dutch governments, in an effort to meet Japanese competition, will provide 40 percent of the finance for the development of a megachip with a capacity of four million bits, the Bonn government said Monday.

The subsidies to Siemens AG and Philips NV will amount to 480 million Deutsche marks (\$189.6 million), the Ministry of Research and Technology said.

The West German govern-ment will contribute 320 million DM over four years, 240 million DM to Siemens and the rest to Valvo, the German affili-ate of Philips. The Netherlands will provide the equivalent of 160 million DM to Philips.

The Siemens-Philips project created by an agreement signed in October 1984, calls for a total investment of 1.4 billion DM. Production of the megachin should begin in 1986 at Regens-burg. West Germany.

For chips of 256,000 bits, which until recently were the most powerful on the market, the Japanese industry had cap-tured 90 percent of world sales. But lately Japanese companies and International Business Machines Corp. have begun to produce one-million-bit chips.

TWA and Icahn Discussing **Revised Merger Agreement**

NEW YORK — Trans World the securities probably what it below their face value. is discussing a possible amendment is said to be having trouble raising enough cash to complete his takeover of the carrier.

Wall Street analysts said the brief announcement appeared to confirm that Mr. Icahn wants to reduce the cash portion of the purchase price for the approxima 16.9 million TWA shares he must

buy to take the company private.
"It would appear that the losses the carrier has sustained and is projected to sustain do not justify the price Mr. Icahn has indicated he would pay," said one analyst, who spoke on the condition that he not

TWA, the fourth-largest U.S. airline, reported a loss of \$13.5 million on revenue of \$1.08 billion in the third quarter ended Sept. 30, and had a loss of \$69.7 million on revenue of \$2.89 billion for the first nine months of the year.

Mr. Icalm owns about 51 percent of TWA's stock and has offered to buy the rest from minority share-holders for \$24 a share, consisting of \$19.50 in cash and \$4.50 in securities, or an indicated \$405.6 mil-

Monday's Wall Street Journal quoting sources it did not identify, said Mr. Icahn wants to change the ratio to about \$14 cash and \$10 in securities, which in effect would

> Mr. Hoffmann declined to elaborate on the announcement. Mr. Icahn's attorney, Dennis Block, asked about the investor's reported financing problems, said, "I think it's improper to comment on stories like that."

Wall street analysts said they

saw no indication that Mr. Icahn is backing away from the TWA acquisition, the result of a bitter takeover battle with Texas Air Corp. that climaxed three months ago.

Investor concern about pros-pects for the Icahn takeover caused TWA common stock to fall Friday on the New York Stock Exchange, closing at \$18.875, down 75 cents, on volume of 1.6 million shares,

U.S. Firm, Fiat To Cooperate on Plant Automation

TURIN - Fiat SpA said Monday that it had agreed on a joint' venture with Digital Equipment Corp. to develop computerized manufacturing systems, in a step towards automated production.

Ezio Salce, managing director-designate of the venture, known as Sesam, said at a news conference that the new company would be owned 50-50 by Coman Spa, a Fiat subsidiary specializing in robotics and Digital Equipment.

European manufacturing com-panies spent \$4.75 billion in 1985 on factory automation systems of which \$2.15 billion was in areas in which Sesam will specialize, ac cording to company officials.

Digital and Comau are already involved in a project with Renault Automation of France to raise productivity in small plants financed by the European Community's Es-

COMITÉ COLBERT Van Cleef & Arpels: Fabulous Firsts

Flawless precious stones — rare Jonquil diamonds as deep-hued as vintage cognac, rich rubies from Burma, exceptional emeralds from Colombia, shimmering sapphires from the misty mountains of Kashmir — spring to life as the ralented lingers of mastercraftsmen translate the daring dreams of visionary designers into splendid jewels signed Van Cleef & Arpels, This reputation for reproducing splendor in imaginative profusion has been syn-

onymous with this legendary jeweller since the three Arpels brothers, Julien, Louis and Charles, founded the firm with their brotherin-law, Alfred Van Cleef, at the glittering height of the Belle Epoch in 1906.

Their international renown is reflected in thriving export sales of \$20 million to \$26 million, 82 a connoisseur clientele including some of the most evocative names of the 20th century; Marlene Dienich, the Duchess of Windson, Maria Callas and Elizabeth Taylor to name a few,

At Van Cleef & Arpels an audacious arristry finds reality in stunning innovation: The celebrated "minaudiere" of the 1930s ingeniously incorporates space for all the ladylike accountments, make-up, smoking accessories, even a tiny "domino" watch, into a slim lacquered gold case with jewelled clasp; the mundane zipper is magnifi-cently ennobled into a diamond necklace and braceler; in the technical tour de force of the "invisible setting," as many as 400 perfectly matched precious stones are indecipherably linked to create the soft curves and delicate petals of a jewelled flower or a ribbon bracelet as supple as silk. Equally impressive is the Van Cleer business style: First of the grand Parisian haute joailliers to open in New York in 1938, first to add a boutique of younger, casual jewelry) in 1953, first to go to Japan 12 years ago where they now have 10 store and the first to create a highly successful fragrance in 1977 called no wonder, First.

But Philippe Arpels, 31, director of this family firm, insists on a distinction: "We are pioneers, but not avant-gardises. We try not to ollow fashion, nor to precede it. What is fashion able, becomes unfashionable. We create jewels that live a long time thanks to classic design and the high quality of our materials." Proof of their success: The jaunty lin whiskered in diamonds, a best-seller since 1953, the delightful butterfly brooches, Art Deco designs their clients ask them to recreate today and the dazzling prices Van Cleef

designs bring at auction.

They are still making miracles. They hardly had time to photograph two "invisible setting" necklaces of rubies, supphires and diamonds which took 18 months to make and were sold two weeks later. The exquisite enchantment of a nuffled collar in finely spun "Tulle d'or" gold, the intricare marquetry of a diamond bow brooch, their entrancing Christmas windows on an Opera theme, all capture the inspired essence of eleganthat is so distinctly Parisian, so unmistakeably Van Cleef & Arpels.

INVITATION TO BID

REPUBLIQUE ISLAMIQUE DE MAURITANIE

Fonds National de Développement (FND) BP: 648 -Novakehott - Avenue Gamal Abdel Nacer - Immeuble AFARCO - Mauritanie. Telex: FND 840 MTN - Téléphone:

FND intends to finance a number of OCEAN FREEZING STERN TRAWLERS to be exploited by Mauritanian ship owners in Mauritanian waters (North-West Africa) for deep sea fishing of cephalopods, shrimps and other demersal species,

FND — a development bank — herewith invites interested firms to submit bids for (10) ten OCEAN FREEZING STERN TRAWLERS having the following characteristics to be delivered in 1986.

- Gross tonnage: about 270 CRT
 Overall length: 35 metres
 Depth: 3.60 metres
- Breadth: 8.5 metres

- Main engine power: 1,000 HP
 Speed on the order of 12 knots
 Fish hold. Capacity: 160 tous fish hold to be maintained at
- temperature of 25°C.

 Freezing capacity: 8 tous per day provided by at least two independeut tunnels
- dent tunners

 Two independent refrigeration systems

 Accommodation for crew: 18 to 24 men
- Accommodation for crew: 18 to 24 men
 Fresh water capacity: 46 m²
 Fuel capacity: 46 m²
 Fuel capacity: 100 metric tons or at least 45 days cruising range
 Fishing gears winches and nets to fish deep sea species (cephalopods, shrimps, other demersals)
 Two auxiliary engines
 Two generators 150 kVA each
 Standard salety, navigation and fish localisation equipment according to "Bureau veritas", specifications
 Trawlers can be

Billion-Dollar Questions

(Continued from Page 11) ty was a key issue in the trial. The jurous concluded that Texaco had

acted inappropriately.

Before Pennzoil and Getty Oil directors had signed their merger agreement, it was topped by Tex-aco, whose \$125-a-share offer was announced Jan. 6, 1984, and ultimately expanded to include all the Getty shares at \$128 each.

Texaco had won. Pennzoil had lost, but it convinced the Houston jury that Texaco had stolen Getty Oil through unlawful interference with its agreement. What was the value of that loss? What damage had Pennzoil actually suffered when Texaco outbid it? The jury concluded that Pennzoil had lost access to the 1 billion barrels of Getty oil to which its three-se-venths share would have entitled it.

Pennzoil had testified that it spent an average of \$10.87 to find a barrel of oil over the past five years, and the jury agreed with Pennzoil that it would have to spend at least that much in the next 25 years to find new barrels to replace the Getty reserves that it lost.

The multiplication was \$10.87 times 1 billion barrels, producing almost \$10.9 billion as the value of the Getty Oil reserves that Pennzoil lost. Then the jury subtracted about \$3.4 billion, the total cost for Pennzoil to buy its anticipated share of Getty. That left the amount for actual damages at \$7.53

The jury, concluding that Texaco had acted with "intentional, willful and wanton disregard" of Pennzoil's rights, tacked on \$3 billion in punitive damages to "send a message" to Texaco and other big com-panies about proper corporate be-havior. That made the total \$10.53 billion. Interest charges ran it to more than \$11 billion.

what it thought the damage award should be. "Texaco chose not to bring in its experts," Joseph D. Jamail Jr., Pennzoil's lead attorney. said last week. Instead, it "chose to sit on its hands."

That left Texaco's attorneys no choice but to offer arguments be-fore Judge Casseb about their ver-sion of what a fair award would be if Texaco were obliged to pay, Mr.

"Something went wrong with that jury. In some fashion, they were confused," said Texaco's attorney, Richard Keeton. He argued that all Pennzoil was entitled to in damages was the value of what it had intended to buy - three-sevenths of Getty Oil's stock. Pennzoil's agreement was to buy Getty stock, not Getty oil reserves, Mr. Keeton said.

Texaco's attorneys said the agreement in principle between Pennzoil and Getty contains merely the promise that Pennzoil might gain access to Getty's oil in the future. They argued that possibility cannot be the basis for the jury's award of damages.

At best, from Texaco's standpoint, it owed Pennzoil nothing. At worst, all it had coming was the difference between what it had proposed to pay and what Texaco ultimately paid, a difference of \$15.50 a share, or about \$460 million.

Or, damages could be figured an entirely different way to produce damages in the \$500-million range, Texaco told Judge Casseb. Using some of the Pennzoil witnesses' testimony, Texaco calculated that it would cost Pennzoil \$3.9 billion to replace the 1 billion barrels of Getty oil it lost in the next 25 years not \$10.9 billion. Its cost of acquiring that oil from Getty - had the After risky, but not uncommon, tactics for damage trials, Texaco offered no evidence during trial of \$500 million.

furt and Buenos Aires. A Rio de Janeiro office will open next year. And sources say the bank is con-templating a Far East office.

Why does a bank, supported as it is by political and economic stability, a tradition of banking privacy, and preferential local tax laws, choose to enter the cutthroat world of international banking?

Because, according to bankers here and in Switzerland, there is red away by the princely rulalways the chance - however far in the future — that Liechtenstein an was presiding over the could succomb to pressure from the United States and other major nowers to relax the bank secrecy code, which has lured so much money to the country.

That could happen to the Swiss, too. But bankers in Liechtenstein e and we've become well es- also fear that someday Switzerland may amend its laws, some of which are less favorable to corporations than are Liechtenstein's, to better compete with Liechtenstein for banking and corporate business.

Then, too, the tax haven business is not what it once was Although about 50,000 corporations still register in Liechtenstein to claim it as their official home, competition for their business is heating up. These days, it is sometimes less expensive for a corporation to register in Panama or to hide money from tax collectors in the Channel Islands.

For now, though, the Liechten-stein bank is doing quite well. Last, year, it had assets of nearly 3.6 billion Swiss francs (\$1,71 billion at current exchange rates), up from 2 billion francs four years ago, when

Mr. Norgren first arrived.

As he takes this mouse-thatroared financial empire into the rat race of international ventures, Mr. Norgren has been especially active in the United States. The ventures, he says, have had mixed results.

In New York City, the Bank in Liechtenstein has opened BIL Management Inc. as a bank branch, which Mr. Norgren hopes to develop "into a very good port-folio management business." BIL recently took on a West Coast partner to help it market its services more effectively. Mr. Norgren said The bank had an unspectacular that once the venture "has proven start; in the mid-1930s, it almost itself, we could well deepen our went bankrupt.

Crown Prince Hans Adam

investment into private banking." In Boston, the Prince of Liechtenstein Foundation has started two venture capital companies .-Transatiantic Capital Corp. and Transatiantic Investment Corp. The companies are engaged in a joint venture with the Wallenberg

interests to get involved in U.S. industrial and financial projects. Most of these ventures, said Mr. Norgren, are "computer-linked high tech." But, he added, "We are also interested in more traditional investments, proven products with proven markets - mostly pharma-An agricultural project in Texas

and Arkansas, begun by the Prince of Liechtenstein Foundation about 11 years ago, recently signed on International Paper Corp. as a ven-ture partner. The operation, called Farms of Texas Co., involves about 50,000 acres (20,180 hectares), mostly of rice. The company harvests, processes, packages and sells

the products. Mr. Norgen says the agricultural project is "quite successful," BIL. Management is on target, and the venture capital results "have been pretty good — I shouldn't like to say merceful use." say successful yet." would provide Liechtenstein with access to all the economic and so-

Industrial Output Rises By 1.8% in Germany

BONN — West German industrial produc-tion, seasonally adjusted, rose a provisional 1.8 percent in October after a revised 0.6-percent increase in September, the Economics Ministry said Monday.

The ministry had originally estimated that production had fallen 0.2 percent in September from the level of August. The ministry said the Federal Statistics Office expected to make a sharp upward revision to the provisional figure for October. Output was 3.9 percent higher than in October last year.

Manufacturing industry increased produc-tion by 1.5 percent in October from September, while the construction sector raised output 7.1 percent, the mining industry by 1.2 percent and electricity and gas producers by 0.9 percent.

BOOKS

TELL THEM IT WAS WONDER-

Selected Writings by Ludwig Bemelmans. Edited by Madeleine Bemelmans. 315 pages. \$19.95.

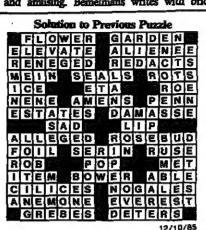

Viking, 40 West 23d Street, New York, N. Y. 10010. Reviewed by Jonathan Yardley

TF you are 50 or younger and grew up in a house where books were treasured, you are likely to have fond memories of "Madeline," a

book by Ludwig Bemelmans about a little French girl's adventures and misadventures. Like much of the best children's literature, it is at once funny and faintly frightening, whimsical and mysterious. Its brief story is accompa-nied by illustrations by Bemelmans that exactly suit its complex mixture of moods. The book has had a large and devoted following since its publication in 1939.

Though he prospered off "Madeline" and its sequels, Beneimans found much more to do in life than write books for children. As is delightfully demonstrated by "Tell Them It Was Wonderful," he traveled in cosmopolitan circles, enjoyed fine food and drink — to excess, if he could — and was richly experienced in life's pleasures. The book is a collection of his autobiographical writings, some of them couched as fiction.

"Tell Them It Was Wonderful" is charming and amusing Bemelmans writes with brio,

whether describing his rather peculiar cur hood in Austria, his wild escapades as a employee of several New York hotels, h vouthful infatuation with an actress, his visit: the Hearst fairyland at San Simeon or h renovation of a house in Paris. As he puts it

"Psychologists say that an excessive intal of food and wine is a substitute for happiness. like pudding. I like wine, roast goose, Virgin ham, shepherd's pie, and lobster stew, I at hungry and thirsty a great deal of the time which accounts for the fact that I have a quired a reputation as a connoisseur of wine and as a gournet. If I am hungry, then, at thing I worry about most is that one day all it goodies will be taken away from me. Oh in not by the Russians, by someone inficted kinder, but still taken away. I am speaking (the day or night after which a photograph (me, and a bad one, will appear on the mosomber page of the newspaper, and under a m name, and a resume of my career, which wa mainly dedicated to the enjoyment of life A least that is what it will say, for I have also acquired a reputation as a lover of life and professor of happiness."

To practice this enviable professorship Be melmans traveled far and wide. "My habitat i mostly bars and restaurants, hotels and depots and the lobbies and entrances thereof, he writes, "In normal times I am found on the decks of steamships, and on the shores of tropic isles. I arrive suddenly, somewhere far away, and once there I haunt the piers and terminals and curse if there isn't a boat of plane to take me back immediately." This tension between the desire to escape and the company that the company the company the company the company that the company that the company the company the company that the company the company that desire to return may well have been the coasequence of Bemelmans' childhood; his perent-were divorced — in small-town Austria in the first decade of the century, this was scandalou - and he saw too little of either of them

But he seems to have been even more eage: to bestow affection than to demand it. His circle of friends was huge, and open to all Many of his fondest memories are reserved for those ordinary men and women, most of them Austrian or German emigres, who worked with him at the old Ritz-Carlton on Madison Avemue, and many of the tales he tells about them are filled with humor and love.

Jonathan Yardley is on the staff of The Washington Post.

CHESS

By Robert Byrne

In this year's United States with a complicated, two edged game.

Albert first brilliancy prize went to Kamrtan Shirazi, a 33-year-old international master from Iran. He shone mightily in his 10th-round game with International Master Boris Koon and the trap with 12 Q-K57, 0-12 QxB7, KR-K1 had sure-ly caucht his eye, too.

However, 6 . . . Q-K2; 7 RxBch!

RxN. PxB; 8 B-B4, NxN; 9 On 14 NxN. Kogan could BxN, B-B4; 10 N-B3, 0-0-0 ws not interpolate the exchange of

At one time, it was claimed

Q-R5!? It was still not too late for the prudent 9 . . . 0-0-0, since 10

B-K3 could have been met by 11 . . P-QB3? below the crushing 22 Q-N4!, kily attempted to hold his one pawn's worth of booty with 9 . . . N-B3!?

After 10 P Viet P V3

After 10 R-Klch, B-K2

(10 ... B-K3?; 11 RxBch); 24 R-Qlch, B-Q4; 25 P-QR4!, 11 Q-N5, Kogan had at his disposal a sharp way to justify his forces mate.

N5, Q-N3; 13 QxNp, KR-N1; 14 Q-R6, P-R3; 15 N-B3, 0-0-0. N this year's United States with a complicated, two edged

ly caught his eye, too. What he had overlooked, or

that 5... N-Q2 was weak underestimated, was Shirazi's because it was thought that 6 powerful attack beginning with Q-K2 was in White's favor. the exchange sacrifice 12

quite adequate for Black in the queens because 14 ... QxQ? game between Anatoly Karpov lets White interpolate 15 and Vlastimil Hort in Amster NxBch to win material

dam, 1980.

Kogan's 7 . . . Q-B3!?, limiting White's replies, may well be an improvement over the old 7 . . . Q-R5, but after Shirazi's 8 N-B3, the merits shown by 8 . . NxN; 9 PxN, 0-0-0. Instead, Kogna's provocative 8 . . . QxP gave Shirazi the chance to offer a gambit with 9 Q-R5!?

After 18 P-KN3, defense with 18 . . . R-Q1 would not have held up against 19 B-B5!, R-Q8; 20 BxQ, RxRch; 21 K-N2, RxB; 22 B-N5, K-Q2; 23 Q-Q8ch, K-B3; 24 B-B4.

Shirazi had already achieved at slight material advantage with 19 BxP, while 19 . . . KR-K1; 20 B-B4 saw the white attack continue un-

the white attack continue un-

previous play, namely, On 25 B-N5!, Kogan could 11 . . . B-K3!; 12 N-N5, Q- not play 25 . . . R/2-K1? in N3; 13 QzNP, KR-K3!; 12 N- view of 26 R-Qlch, B-Q4; 27

pire be told to remove his jacket as the sun was reflecting off its but-

Wilander, seeded third, was gracious in defeat, conceding that his compatriot had simply outplayed him. "If there's somebody I don't mind to lose very much to, it's Stelan," said Wilander, 21. "He's a very sood friend." very good friend."

Sunday night, the two shared a "Twe few beers and, before the start of life." their final, took the extraordinary step of warning up against each other. Veteran tenns officials said they could not remember two finalists ever doing so.

Edberg is the only player ever to win the junior boys title in all four grand-slam tournaments in a single year (1983), and Wilander said he should now be considered for one of the singles berths on the Swedish team that will meet West Germany in the Dec. 20-22 Davis Cup final

But, in Düsseldorf, Hans Ohlsson, the Swedish coach, said that "despite Edberg's triumph, I will

Swedes in Melbourne is surely good for Sweden, but is doesn't make our job any easier," said Ohlsson. "Switching from grass to indoor surface could create prob-

The only hint of an excuse Wilander offered for his loss on Monday was having been "more pumped up" for his semifinal Saturday agamst Yugoslav Slobodan Zivojinovic, who had upset John McEnroe in the quartestinals, and that he had been unsettled by the rain-disrupted schedule.

"This has been one of my great-est tournments ever," said Edberg. "Twe never been so happy in my

Edberg follows Björn Borg and Wilsnder into Sweden's ranks of grand slam titlists, although his attacking game contrasts starkly with the baseline tactics of the other two. But if his tennis is more excit-"We're kind of cool people," he said, "we always behave well and keep our cool," Arguing with umpires? "I can't to that — I'm no good at it."

players: Wilander won the French This was the 10th consecutive from December to January (to be on natural grass and the U.S. Open Open, West German Boxis Becker year that a foreign player has won played next in 1987), is expected to on hard courts. (AP, AFP, UPI)

A grounds crew member took the plunge at tarpaulin-covered center court early Monday.

won Wimbledon and Ivan Lendl of Czechoslovakia took the U.S. champion being Mark Edmondson in 1976. It is expected that this will be resumed on an artificial grass surface.

That would mean the four grandgood at it."

Open.

Edberg's victory meant the four 1985 grand-slam men's singles titles were won by four different the semifinal, 6-7, 7-5, 6-1, 4-6, 9-7.

That would mean the four grand-slam men's singles titles were won by four different the semifinal, 6-7, 7-5, 6-1, 4-6, 9-7.

That would mean the four grand-slam events would be contested on played on natural grass. The tour-four different surfaces — the the semifinal, 6-7, 7-5, 6-1, 4-6, 9-7.

Defense Keys 125-119 Laker Victory

NBA FOCUS

INGLEWOOD, California - It can't be good news for the rest of the National Baskethall Association that the Los Angeles Lakers

can play defense, too.

The highest-scoring team in the league this year held Dallas to 14 points in the fourth quarter here Sunday night and rallied from an eight-point deficit to beat the Mavcricks, 125-119.

"Defense is the most inconsistent part of our game," said Laker Coach Pat Riley. "It seems like

the National Football team.

Quotable

we're happy to trade baskets until we're ready to make a stand. In our big games, we've made that stand early. This time, we made no con-centrated effort on defense until the fourth quarter." Riley gave rookie forward A.C.

Green credit for the team's fourthplug," Riley said. "Both he and Byron [Scott] made some great defensive plays."

points in the final period and led the Lakers with nine rebounds. Scott scored 12 of his team-high 30 points in the last 12 minute The Lakers trailed, 105-98, after

three quarters and Dallas — thanks to a 41-point third period —led by 108-100 in the early moments of the fourth quarter. But Los Ange-Green credit for the team's fourth-quarter rally. "A.C. was our spark-reeled off an 11-3 streak to tie the score at 111-111 with 4:46 left.

The defending champion Lakers scored 25 of the game's last 36 points in handing Dallas only its second loss in its last nine outings. We're playing very good, but not our best," said Earvin Johnson, who had 28 points and 15 assists for the winners. "This year we have a lot more firepower. We've won a

lot of games that we would have

lost last year." The Mavericks' Mark Aguirre, who led all scorers with 32 points, said it wasn't the Laker defense that won the game. "I don't think it was their defense; their offense finally got going." he said. "We Oilers from the Los Angeles Express of the United States Football League. Prior to that he had coached the Edmonton Eskimos in the red most of their attacks until their last one. The Lakers just ran away from us in the last eight

ART BUCHWALD

The Blue-Crayon Defense

son, came into the living room. "Have you done your home-work?" her father asked.

Alison handed him a sheet of

"It's Star Wars," Alison said. This is the sun and this is the house and this is the mommy and this is the daddy and this is the

tree. "That's fine, but how do you get Star Wars out of that?"

This blue cir- Buchwald cle over everyone is Star Wars. The rockets can't get through to kill the mommy, the daddy, the child and

"I don't see how that blue arc

can stop missiles from hitting your family," Barry said. Alison pointed to three red missiles bouncing off the arc. "You

see? The hombs are stopped and can't hit anyone." "Where did you get the idea that

a blue crayon can stop a red one?"
"I saw it on television. It said if everyone supports Star Wars we will be safe from getting killed. "Don't lie to me," Alison's father

"She's not lying." I told him. "I saw the same TV commercial. It's

'Me and My Girl' Wins A Top Olivier Award

The Associated Press LONDON - "Me and My Girl" has been named best musical at the 10th annual Olivier Awards, and its star, Robert Lindsay, won as best actor in a musical. Patti LuPone was named best actress in a musical for "The Cradle Will Rock" and

"Les Miserables." Alan Ayckbourn's "A Chorus of Disapproval" was named best com-edy and Peter Barnes' "Red Noses" won as best play. Antony Sher was named best actor for "Torchsong Trilogy" and "Richard III."

WASHINGTON I was over at Barry Israel's the other night when his 8-year-old daughter, Alitiative will work. They're hoping if they make it simple enough Ameri-

cans will buy it."

Barry said, "What a crock. paper with a crayon drawing on it.

What is it?"

They're using a kid's drawing to sell a pie-in-the-sky idea."

I said, "Don't jump to conclusions that a child was the artist. I know several scientists who could easily have drawn it."

"The drawing doesn't convince me we should spend zillions on Star

laser beams and enhanced deterrence. If kids believe a blue crayon can stop a red one then they won't

Alison was just standing there reepishly. Finally she said, "Is my

drawing all right?"
Her father replied, "As far as it goes it is, Hand me a red crayon and a black one. Okay, now watch carefully. The red crayon can't get through the arc, and the house and family are perfectly safe. Right?"
"Uh-huh," Alison said, not
knowing where her father was go-

"Now I take the black crayon and it slices right through the shield and knocks out the sun, the house and the family of three."

"Because black crayons can al-ways go through blue ones. Even a nuclear umbrella won't stop them. That's why a blue crayon is not going to save us."

Alison looked at me for some

help.
"I have to agree with your fa-ther," I told her. "There are too many different colored crayons for one blue are to stop. Even if only one color got through it would wipe out your mommy, daddy and child."

Barry said, "Did you hear what your Uncle Art just said? Listen to nim. He knows everything."
Alison's lower lip was quivering.

"You ruined my drawing." Her father replied, "I just wa ed to teach you a lesson. Don't believe everything you see on tele-

Hark! the 'Harold' Gamesters' Thing

By E. R. Shipp New York Times Service

HICAGO - It was close but in the end Yale squeaked past Northwestern by a score of 24 to 22.

It was not a football game, nowever. It was a Harold game, with the Purple Crayons from Yale playing the No Fun Mud Piranhas from Northwestern and the Avant-Garfieldes from the University of Chicago, who finished a distant third.

Harold is a team "sport" based on techniques developed in improvisational theater. There are even teams around the United States and others are being orga-nized on college campuses. Del Close, who is the Abner Doubleday and P. T. Barnum of Harold, says the game may soon hit the hig time: Two major national corporations are considering sponsoring teams.

Close, an actor and a former director of the Second City comedy troupe, has described Harold as "a parlor game gone mad." He began developing it in 1967 when he was directing an improvisa-tional troupe in San Francisco, he said. Close and his partner, Chandra Halpern, are promoting Harold among students they meet at college workshops and at their school in Chicago.

At the Crosscurrents Cabaret

Theater, a comedy club in a 100-year-old former Swedish meeting hall, three teams were put through their paces recently by a demanding audience of 200. Each team took the stage for 20 to 30 minutes to improvise scenes using word games, mime, songs, poetry and dance, but without scenery or props. The scenes were all sup-posed to relate somehow to a theme suggested by the audience. Harold, which might be called competitive improvisational the-

ater, has some loose rules. The teams have no time at the start of a game to discuss how they will depict their theme, and there is a

scoring system.
The Avant-Garfieldes' theme was buttons; the No Fun Mud Piranhas' themes were hair and disease, and the Purple Crayons'

were oranges and orange juice.

The audience applanded, commented, mouned and hooted as each team glided in and out of scenes. Some of the scenes did

Del Close (right) explaining Harold to audience; Purple Crayon (above) during group's winning routine.

not seem to relate to the theme at plause at the end of each team's all but, when least expected, there came an allusion.

A pool-hall scene got around to buttons when a man materialized from an imaginary button on an imaginary pool table and launched into an explanation that had to do with a bad joke he once told: "The bad-joke police came and they took me away and made me into a political slogan and put me on a button."

The Yale team spun skits about a poet trying to find words to rhyme with "orange," about sing-ing fruit known as the Citrus Kids and about an anti-Senitic man who disparages "orange

When one team member appears to run out of steam, others come to the rescue with lines that give the scene a lift or lead into a Aficionados in the audience

dissect the performances. Steve Wilczynski, who has tried his hand at Harold, said: "When something from one scene is re-flected in another, you wonder, 'How can they do that? How can they remember that?"
The audience votes with its ap-

FOR SALE

performance, awarding one to six points in each of four categories intelligence, theme, structure

It does not take much to orga-nize a Harold team. Aym Halli-day, a member of the No Fun Mud Piranhas, said, 'The way we found out was by a note tacked up on a board."

Eric Berg, who studied improvisation in Chicago while appearing as Tom Sawyer in the Goodman Theater's production of "The Adventures of Huckleberry Finn last winter, has organized a team at Yale. He said he had received inquiries from prospec-tive teams at Harvard, Vassar, Dartmouth and Columbia

"One of the things that might be making it catch on," Close said, "is that it gives you a reason for your education. You pay attention in the courses because you can use the information in Harold."

Harold teams can have any number of members. The No Fun Mud Piranhas are mostly theater anajors at Northwestern. The Pur-ple Crayon consists of Yele stu-dents majoring in political sci-

ence, architecture, comparative literature, art history, electrical engineering and British studies.

Close and Halpern said it was their dream that one day the results of Harold competitions would be reported on the evening

Opéra Choice Backs Out

his mind: The executive director of the Los Angeles Philharmonic says he will remain at his current position rather than become general administrator and artistic director of the Paris Opera. Fleischmann who announced late last month that he would take the Paris job. said that he had not signed the three-year contract with the Opera and that formal approval from the French government had yet to be made. The contract was set to begin in October 1986. Fleischmann insisted that his reasons were strictly personal: In a telex to Jack Lang, the French minister of culture, he said, "The immense curpouring of appreciation for my work here, and affection for me personally made me realize that it was impossible for me to leave this great orchestra and this remarkable community."

. . Lang announced France's national prizes for arts and letters Monday at the Opera. The laure-ates included the film director Claude Miller, the choreographer Jean-Claude Gallotta, the historian Michelle Perrot, the writers André Pieyre de Mandiargues and André Frenand, the composer Pierre Henry, the Spanish-born painter Antoni Tapies, the sculptor and painter Pol Bury, and the stage director Ariane Muochkine along with her Théâtre du Soleil.

President Rouald Reagan and his wife, Nancy, joined a celebrity-filled audience in saluting six American artists who received the Kennedy Center Honors of 1985 for lifetime contributions to the U.S. cultural heritage, Those hon-ored included two old Reagan pals: Bob Hope and the actress Irene Dume. The others were the choreographer Merce Cumingham, the lyricist Alan Jay Lerner and his songwriting partner, Frederick Loewe, and the opera administra-tor Beverly Sills.

The Spanish singer Raphael says he has bought Richard M. Nixon's "Florida White House" for \$1.05 million, primarily for historical reasons. The four-bedroom ranch home in Key Biscayne still bears many reminders of its former ownthe swimming pool Pat Nixon gave of Framher husband as a birthday present the swimming pool Pat Nixon gave of Framher husband as a birthday present the mand Charles (Bebe) Rebozo as a Union.

next-door neighbor. John Allen Jr., president of the company that Ernest Fleischmann has changed handled the sale, said: This is the house where the president and his wife and daughters actually lived and stept. That's the reason Rapha-el bought it." The singer's wife and children will live in the house when he begins a yearlong U.S. tour early next year.

Two years after drawing boos from the demanding audiences of La Scala, Luciano Pavarotti week ovations and critical praise for his opening night performance in Ver-di's "Aida." Duilio Cousir, music critic for the Milan newspaper Cor-riere della Sera, wrote, "The voice of Pavarotti is a marvel that never lets him down" — but Italian cat-ics had wondered if the 50-year-old tenor would displease La Scala's audience as in March 1983, when his voice failed in the finale of Donizetti's "Lucia di Lammermoor." Pavarotti accompanied by Maria Chiara in the title role and Ghena Dimitrova, took eight curtain calls before the sold-out house.

The American oil heir J. Puni Getty 2d, who has lived in Britain for about 20 years, says he would love to become a British citizen but hasn't applied because he would have to pay more taxes and would have less money to give away. "For years and years, I have wanted to become a British citizen, but my advisers have asked me not to because of the enormous tax consequences," Getty. 53, told the Press Association, Britain's domestic news agency.

A crowd packed a sports arena in Madrid on Sunday to celebrate the birthday of Dolores Ibarrari, the "Pasionaria" of the Spanish Civil War, who turned 90 Monday Estimates of the audience at the show. war, who turned 90 Monday, Estimates of the audience at the show by Spanish entertainers ranged from 15,000 people to 25,000. Its fruit, honorary president of the Spanish Communist Party, sat quietly during the three-hour show.
